GMC

## About This Publication

This catalog is not updated during the model year and should not be used for ordering purposes. It is intended as a source of basic information. All illustrations and specifications in this literature are based on the latest product information available at the time of publication. General Motors reserves the right to make changes at any time without notice. For further details, consult your local dealer.

Care must be taken during customer installation of equipment and wiring to ensure that all holes drilled in the body are corrosion protected, properly sealed and that vehicle wiring harnesses, piping or other components have not been displaced or damaged. Aftermarket equipment installers must be mindful of applicable Federal Motor Vehicle Safety Standards. This information can be obtained directly from the National Highway Traffic Safety Administration. Adding non-dealer accessories or making modifications to the vehicle can affect vehicle performance, aerodynamics, and overall top speed. Please return all police vehicles to factory condition and settings upon decommissioning to prevent civilians from using these new 2022 calibrations, lighting and other features intended only for police and emergency customers. Wiring connection or splice changes are to be removed before the vehicle is returned to civilian use.

These vehicles are equipped with an airbag system. The airbag system in your police vehicle includes frontal driver and front outboard passenger airbags, front seat back side impact airbags and roof rail mounted head-curtain airbags. Customer installed equipment such as security barriers behind the front seats should not be mounted so that the barrier ends are within the side airbag deployment zones. The sensors and other components for the airbag system must not be relocated to accommodate the installation of customer furnished equipment; please refer to the service manual for sensor and other component locations. For information concerning instrument panel top pad mounted equipment and airbag system deployment zones, see the airbag information section in this catalog and the vehicle owners manual.

A note about vehicle alterations by independent suppliers: This catalog shows pictures of vehicles that have been altered or upfitted with equipment or components supplied to Chevrolet or its dealers by independent suppliers. GM is not responsible for the safety or quality of design features, materials or workmanship of any alterations by third parties.

## 2022 TAHOE POLICE PACKAGE

- **UPDATES FOR 2022 MODEL YEAR**
- **STANDARD FEATURES**
- **POWERTRAIN & EMISSIONS**
- **SPECIFICATIONS**
- **SPEEDOMETER/CLUSTER DISPLAY**
- **RADIO SCREEN DISPLAY**
- **STANDARD FEATURES HIGHLIGHTS**
- **COLORS, INTERIOR TRIM AND SEATS**
- **OPTIONAL FEATURES**
- **OnStar®**
- **OPTIONAL FEATURES HIGHLIGHTS**
- **WIRING DIAGRAMS**
- **STABILITRAK**
- **LOADING ZONES**
- **AIRBAG DIMENSIONS**
- **AIRBAGS FAQ**
- **MAINTENANCE AND LIMITED WARRANTY**

This document shows vehicles that have been altered or upfitted with equipment, bodies or components. GM is not responsible for the safety or quality of design features, materials or workmanship of any alterations by third parties.

# UPDATES FOR 2022

## STANDARD NEW FEATURES

- **Buckle to Drive (T8Z)** becomes standard. This feature ensures the driver safety belt is buckled before the shift out of Park can occur. (This feature is defaulted off for 9C1, but is customizable in the infotainment menu.)
- **Front and Rear Park Assist (UD5)** becomes standard. There is a service cal (SK5) available at the dealer to disable the Front Park Assist portion.
- **Flasher system (6J7)** is now standard.

## OPTIONAL NEW FEATURES

- **LED Strobe front and rear lamp packages (SEO 6J8, 6J9, 6JE, 6JG)** available 22MYi. Standard Flash Pattern with sync circuits. Compatible with most aftermarket lighting controllers
  - 6J8 White DS/White PS
  - 6J9 Red DS/ Red PS
  - 6JE Blue DS/Blue PS
  - 6JG Red DS /Blue PS
- **Exterior color (G48) Auburn Metallic**
- **Exterior color (G6M) Dark Ash Metallic**
- **Dealer calibration (SK3)** is available to change codes at time of sale for vehicles with common FOBs (6E2/6E8)

## DELETIONS

- **Exterior color (GJI) Shadow Gray Metallic**
- **Exterior color (GS6) Graywood Metallic**
- **(RIB) All-weather floor liners, LPO**
- **(VAV) All-weather floor mats, LPO**
- **SEO (BCN) Retail Locking Calibration**

The two-wheel drive and four-wheel drive Tahoe (9C1) Police Package has been designed for police work up to, and including high-speed emergency vehicle operations. GM restricts the sale of police vehicles and they are not to be sold to retail customers. Model CC10706 (two-wheel drive) or CK10706 (four-wheel drive) with equipment group 1FL are required when ordering 9C1 Police Package. Content, Options and Specifications shown are for the police version only which differ from retail civilian model.

9C1 PPV Package includes: Heavy-duty police-rated suspension with unique StabiliTrak performance calibration. Full independent suspension with monotube dampers, linear coil springs that set the trim height 20mm lower than civilian model, 35mm solid front stabilizer bar, 32mm hollow rear stabilizer bar. Police specific Brembo front brakes utilize 6-piston fixed calipers on 410mm rotors (32mm thick), 1-piston sliding rear calipers on 345mm rotors (20mm thick). 75/55R20 all-season V-Rated Firestone Firehawk Pursuit tires are mounted on 20" heavy-duty black steel wheels with bolt-on center caps and includes a matching full-size spare. High-capacity air filter, dual battery isolator with 760 cold-cranking amp auxiliary battery, 250 amp high output alternator, auxiliary battery circuit for customer connection located in rear cargo area, electrical power & vehicle signals for customer located on center front floor and cargo area with surveillance mode circuit. Certified speedometer, work truck steering wheel with two re-purposed switches to operate after-market emergency equipment and third row seat delete are standard. Police specific front seat backs and bolsters are skived to better accommodate officers wearing duty belts. Available 4WD with Autotrac electronic transfer case, includes 2HI, 4AUTO and 4HI settings.

## STANDARD 9C1 INTERIOR FEATURES

<b>AIRBAGS<sup>1</sup></b>	Six airbags: Frontal airbags for driver and front outboard passenger; Seat-mounted side-impact airbags for driver and front outboard passenger; Head-curtain airbags for all rows in outboard seating positions
<b>AIR CONDITIONING</b>	Tri-zone automatic climate control, with individual climate settings for driver, right front passenger and rear seat occupants. Includes rear air conditioning.
<b>ASSIST HANDLES</b>	Overhead, driver and front passenger, located in headliner. Front passenger A-pillar and second row outboard B-pillar. Not available with (7X2) or (7X3) spotlights
<b>AUDIO SYSTEM<sup>2</sup></b>	Chevrolet Infotainment 3 system, 8" diagonal color touchscreen, AM/FM stereo. Additional features for compatible phones include: Bluetooth audio streaming for 2 active devices, voice command pass-through to phone, Wireless Apple CarPlay and Android Auto capable. Includes 6 speaker system.
<b>BLUETOOTH®<sup>3</sup></b>	Personal cell phone connectivity to vehicle audio system
<b>BUCKLE TO DRIVE</b>	Prevents vehicle from being shifted out of Park until driver seat belt is fastened; times out after 20 seconds and encourages seat belt use, can be turned on and off in Settings or Teen Driver menu. This feature is defaulted off for 9C1, but can be turned on in the Infotainment menu.
<b>WI-FI HOTSPOT</b>	Available Wi-Fi® hotspot can connect up to 7 devices; includes data trial for 1 month or 3GB (whichever comes first). Requires properly equipped vehicle. Service varies with conditions and location. Requires active service plan. Data plans provided by AT&T, availability subject to change. Visit <a href="http://www.gmfleet.com/technology/connected-vehicle.html">www.gmfleet.com/technology/connected-vehicle.html</a> for details and limitations
<b>COMPASS</b>	Displayed in digital gauge cluster (see Picture on Speedometer/Cluster page)
<b>CONSOLE, OVERHEAD</b>	Includes map lights, OnStar buttons and Passenger air bag indicator
<b>CRUISE CONTROL</b>	Electronic with set and resume speed
<b>DRIVER INFORMATION CENTER</b>	4.2" diagonal color display, includes driver personalization
<b>FLEET CONNECTED ACCESS</b>	Fleet Connected Access with 10 years of standard connectivity which enables services such as, Vehicle Diagnostics, Dealer Maintenance Notification, Chevrolet Smart Driver, Marketplace and more. Limitations apply. Not transferable. Standard connectivity available to original purchaser for ten years from the date of initial vehicle purchase for model year 2022 or newer Chevrolet vehicles. See <a href="http://www.gmfleet.com/technology/connected-vehicle.html">www.gmfleet.com/technology/connected-vehicle.html</a> for details and further plan limitations. Connected Access does not include emergency or security services. Availability and additional services enabled by Connected Access are subject to change
<b>FLOOR COVERING</b>	Black rubberized vinyl. Deleted when (B30) floor covering is ordered.
<b>KEY FOB</b>	Two KEYS/FOBS and mechanical keys for ignition and doors. Four additional fobs are available. While unlimited number of learned KEYS/FOBS can operate Keyless start and Keyless open, for a particular vehicle, only the last 8 KEYS/FOBS learned will allow the key fob buttons to work. See Available Options page for ordering codes. See Optional Equipment page for programming procedure.
<b>KEYLESS OPEN</b>	Keyless Open allows you to lock and unlock the vehicle using the driver door or front passenger door handle without taking the key fob out your pocket. Keyless open, with the key fob in your possession, locks and unlocks your vehicle's doors without having to use the key fob, increasing convenience. If the key fob battery is depleted or due to wireless interference, vehicle may be unlocked using the mechanical key. See Owner's Manual for details.
<b>KEYLESS START</b>	Keyless Start allows you to start the vehicle when the key fob is inside the vehicle at the front seats and without taking the key fob out of your pocket. Keyless start uses an integrated key fob sensor instead of a traditional key. If the key fob battery is depleted or due to wireless interference, vehicle may also be started by resting the key fob on top of the start button. See Owners Manual for details.
<b>GLASS</b>	Deep-tinted, all windows (except for windshield, and front occupant side glass which are light-tinted). Windshield: >70% visible light transmittance; Front Doors: >70% visible light transmittance (UV is reduced to 35% or less); Rear Doors and Cargo Area: 12% +/- 3% visible light transmittance. Non-tinted, solar absorbing glass available (see option AKP)
<b>GLOVE BOX</b>	Locking door, includes courtesy light
<b>INSTRUMENTATION</b>	Digital Speedometer and 140 mph certified analog speedometer, 1 mph increments and digital trip odometer with gauges for engine oil pressure, fuel, battery volts, coolant temperature and tachometer. Driver Information Center displays compass, time, tire pressure, fuel range, off-road gauges, remote key learn, vehicle warnings, and backup sensor proximity status while in reverse. The headlamps can be dimmed with the headlamp switch in the Auto position if 9G8, DRL Delete, is not present. If 9G8 is present, when the headlamps switch is in the Auto position, no exterior lights will be on, and the dash will assume daytime intensity. When 9G8 is present, the cluster can be dimmed with the headlamp switch in Manual Headlamps position.
<b>LIGHTING</b>	Interior with dome light, cargo lights, door handle or Remote Keyless Entry-activated illuminated entry and map lights in front and second seat positions with control switch in the roof console
<b>MIRROR, INSIDE</b>	Rearview, manual day/night
<b>REAR VISION CAMERA<sup>4</sup></b>	Provides driver a high-resolution digital image of the area directly behind the vehicle when in Reverse at low speeds

**1.** Always use seat belts and child restraints. Children are safer when properly secured in a rear seat in the appropriate child restraint. See the Owner's Manual for more information. **2.** Vehicle user interface is a product of Apple and its terms and privacy statements apply. Requires compatible iPhone and data plan rates apply. Apple CarPlay is a trademark of Apple Inc. Siri, iPhone and iTunes are trademarks of Apple Inc., registered in the U.S. and other countries. Vehicle user interface is a product of Google and its terms and privacy statements apply. Requires the Android Auto app on Google Play and an Android compatible smartphone running Android 5.0 Lollipop or higher. Data plan rates apply. Android Auto is a trademark of Google LLC. **3.** Go to [my.chevrolet.com/learn](http://my.chevrolet.com/learn) to find out which Bluetooth phones are compatible with the vehicle. **4.** Safety or driver assistance features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Visibility, weather, and road conditions may affect feature performance. Read the vehicle's owner's manual for more important feature limitations and information.

## STANDARD 9C1 INTERIOR FEATURES (CONTINUED)

<b>MICROPHONE, WIRING</b>	Provision located above headliner over driver position for customer supplied microphone and department radio
<b>OnStar®</b>	Fleet orders with properly equipped vehicles receive a 3-month trial of Fleet Connected Services and 3 months of Fleet Safety & Security plan coverage. Connected Services includes Connected Navigation, Remote Access Plan and 1 month or 3GB of data (whichever comes first). OnStar links to emergency services. Services subject to user terms and limitations. Certain services require working electrical system, cell reception and GPS signal. OnStar links to emergency services. Data plans offered by AT&T. See <a href="http://gmfleet.com/connected-services">gmfleet.com/connected-services</a> for details. Availability subject to change. See <a href="http://www.gmfleet.com/technology/connected-vehicle.html">www.gmfleet.com/technology/connected-vehicle.html</a> for details and limitations.
<b>OUTSIDE TEMPERATURE</b>	Displays in top left corner of Driver Information Center and lower right corner of Infotainment screen
<b>PASSENGER COMPARTMENT AIR FILTER</b>	The filter reduces the dust, pollen, and other airborne irritants from outside air that is pulled into the vehicle. This filter is located behind the passenger side glove box.
<b>PARK ASSIST (FRT &amp; RR)<sup>1</sup></b>	Sensors for audible warning on front and rear bumper to assist with parking (see illustration section for description) A dealer calibration, SK5, is available to disable the front system.
<b>POWER OUTLET</b>	Front auxiliary, 12-volt, located in the center stack of instrument panel
<b>PROTECTED IDLE</b>	The Protected Idle Feature allows the vehicle to remain idling but will not allow the transmission to be shifted from Park without a valid key fob
<b>RESTRAINT SYSTEM</b>	Seat belts at all designated seating positions with driver and front outboard passenger pretensioners. Airbags <sup>2</sup> : frontal airbags for driver and front outboard passenger; includes front outboard Passenger Sensing System. Seat-mounted side-impact airbags for driver and front outboard passenger; Head Curtain airbags for all rows at outboard seating positions. Note: Nine inch seatbelt extenders are available (part number 19259268) through our dealers at no charge.
<b>SEATS, FRONT</b>	CLOTH 40/20/40 individual seats, 3 passengers with 10-way power driver seat adjuster (fore/aft, up/down, tilt, recline, and lumbar), and 8-way power passenger seat adjuster (includes lumbar). Adjustable outboard head restraints and storage pockets. Center seat section can be deleted (5Y1) for 15" of open floor space (see front seats and interior trim illustration page for further details).
<b>SEATS, REAR</b>	CLOTH split-folding and sliding 60/40 bench seats includes folding center armrest with cup holders, outboard seating position headrests and reclining rear seat back (available in vinyl option code 5T5). 2nd row rear seat delete available with option code ATZ (ships as incomplete vehicle).
<b>STEERING COLUMN</b>	Manual tilt and telescopic
<b>STEERING WHEEL CONTROLS</b>	The steering wheel includes control buttons for Cruise Control, Driver Information Center and the Vehicle Radio. The two-position Radio Favorites up/down buttons on the left backside of the steering wheel have been re-purposed for operating customer furnished equipment, i.e., push-to-talk microphone, emergency warning devices, etc. The re-purposed Radio Favorites button no longer permits the selection of the radio broadcast stations.
<b>TEEN DRIVER</b>	A configurable feature that lets you activate customizable vehicle settings associated with a key FOB, to help encourage safe driving behavior. It can limit certain available vehicle features, and it prevents certain safety systems from being turned off. An in-vehicle report card gives you information on driving habits and helps you to continue to coach your new driver.
<b>THEFT DETERRENT SYSTEM</b>	Vehicle content, electrical, unauthorized entry
<b>USB CHARGING PORTS</b>	Four: One Type A and one Type C located on center stack under climate controls and one Type C located in rear cargo area on left and right sides.
<b>VISORS</b>	Driver and front passenger illuminated vanity mirrors, sliding
<b>WARNING TONES</b>	Headlamp on, key-in-ignition, driver and right-front passenger seat belt unfasten, backup sensor with warning tone and turn signal on
<b>WINDOWS, POWER</b>	Power driver and passenger with Express-Up/Down. Power rear with Express-Down.

**1.** Safety or driver assistance features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Visibility, weather, and road conditions may affect feature performance. Read the vehicle's owner's manual for more important feature limitations and information. **2.** Always use seat belts and child restraints. Children are safer when properly secured in a rear seat in the appropriate child restraint. See the Owner's Manual for more information.

## STANDARD 9C1 EXTERIOR FEATURES

<b>ASSIST STEPS</b>	Black, mounted between front and rear wheels
<b>BODY SIDE MOLDINGS</b>	Not available
<b>CAPLESS FUEL FILL</b>	This vehicle has a capless refueling system and does not have a fuel cap. The filling nozzle must be fully inserted and latched prior to starting fuel flow. Overfilling the fuel tank by more than three clicks of a standard fill nozzle may cause vehicle performance issues, including engine stalling and damage to the fuel system, fuel spills, potential fuel fires.
<b>DEFOGGER</b>	Electric, rear window
<b>DOOR HANDLES</b>	Body color
<b>DOOR LOCKS</b>	Door locks can be programmed via radio settings menu. Lock cylinder is only available on driver door. Other side doors and lift gate are controlled by driver door-mounted switches. Includes 2 remote transmitters. See also LOCKOUT PROTECTION.
<b>FASCIA, FRONT</b>	Front high-approach angle with recovery hook openings, but does not include hooks. See Option (V76) for recovery hooks.
<b>FLASHER SYSTEM</b>	Headlamp and taillamp, DRL compatible with individual control wires. Includes SEO (5J9) taillamp flasher calibration, Red/White and SEO (5LO) taillamp flasher calibration, Red/Red. See headlamp circuit 8863 and taillamp circuits 8864 & 8865 in wiring schematic.
<b>FOG LAMPS</b>	Not available
<b>HEADLAMPS</b>	LED Reflector high and low beam with flash-to-pass feature, automatic exterior lamp control and daytime running lamps. Daytime running lamps use reduced low-beam intensity. Altering headlamp assembly is not recommended, General Motors is not responsible for the effects of any modifications.
<b>HORNS</b>	Dual note
<b>KEYLESS ENTRY REMOTES</b>	Two extended range keys/fobs with non-functional panic button: exterior lamps flash and horn chirp are disabled as default setting. Remote feedback can be programmed via radio Vehicle Settings.
<b>LUGGAGE RACK</b>	Not available
<b>MIRRORS, OUTSIDE</b>	Outside heated power-adjustable, manual-folding, body-color
<b>RADIO ANTENNA</b>	Located inside liftgate spoiler
<b>REAR LIFTGATE</b>	Manual gate and hinged glass hatch. Unlock buttons located on exterior and remote FOB. Unique police programming only allows unlocking with the FOB or interior courtesy switch.
<b>TIRE PRESSURE MONITOR WITH TIRE FILL ALERT</b>	Tire Pressure Monitoring System. Full-size spare includes unprogrammed sensor. Includes Tire Fill Alert feature in addition to the DIC warning when a tire has low pressure. This feature provides audible and visual indication when air is being added to the low tire to aid in achieving optimal tire pressure.
<b>TIRES</b>	Firestone Firehawk Pursuit 275/55R20 all-season, V-rated, blackwall, (see standard equipment illustrations section) includes matching spare tire
<b>TIRE, SPARE</b>	Full-size matching spare with unprogrammed TPM, lockable with outside winch-type carrier mounted under frame at rear.
<b>UNDER HOOD LAMP</b>	Not available
<b>WHEELS</b>	20" x 9" black steel (includes matching full-size spare)
<b>WHEEL CENTER CAP</b>	Bolt-on aluminum with black finish
<b>WINDSHIELD</b>	Solar absorbing shaded upper with acoustic laminated glass
<b>WIPERS, WINDSHIELD</b>	Intermittent, with rain sensing
<b>WIPER, REAR</b>	Intermittent with washer

## STANDARD 9C1 ELECTRICAL FEATURES

<b>AUXILIARY POWER, FRONT</b>	Wiring connection from circuits in upfitter branch harness between front seats. Two relays, rated at 20 amp load, and one 50 amp auxiliary battery circuit for connection and control by customer. The relay coil fusing can be configured to operate the pair of relays via battery power or ignition controlled power. See the Upfit Circuits List and Wiring diagrams for 50E FUSE BLOCK AUXILIARY BATTERY and X51 JUNCTION BLOCK INSTRUMENT PANEL AUXILIARY.
<b>AUXILIARY POWER, REAR</b>	Wiring connection from circuits in upfitter branch harness at left side of cargo area. Two relays, rated at 20 amp load, and one 100 amp auxiliary battery circuit for connection and control by customer. The relay coil fusing can be configured to operate the pair of relays via battery power or ignition controlled power. See the Upfit Circuits List and Wiring diagrams for 50E FUSE BLOCK AUXILIARY BATTERY and X51 JUNCTION BLOCK INSTRUMENT PANEL AUXILIARY.
<b>LOCK-OUT PROTECTION</b>	When a key is in the vehicle and the driver door is open with the ignition ON or ACC, an audible alarm will sound. If the doors are locked and closed, the driver door will remain locked. The engine will remain running if ON. When the ignition is OFF and the last door is closed and there is a key in the front seat area of the vehicle, the driver door will unlock. See also the PROTECTED IDLE procedure in the Standard Equipment section of this document.
<b>POWER OUTLETS</b>	A 60 Hertz, 110 volt AC outlet is located in the center section (20%) of the front seat. The outlet is rated at 150 watts. Overload power before auto shut off is 275 watts for 10 seconds or 418 watts for 1 second. 12 Volt auxiliary outlets also included: one in the instrument panel, and two in the cargo area. 12 volt outlet power is configurable to be battery power or ignition controlled power. When option 5Y1, Center Seat Delete is ordered, the 110 volt AC power outlet and wire harness in the center seat console are shipped separately for customer installation.
<b>SURVEILLANCE FEATURE</b>	Body Control Module (BCM) calibration to disable all automatic lighting. See UPFIT WIRING CIRCUITS LIST.
<b>UPFITTER WIRING PROVISIONS</b>	Upfitter wiring circuits are provided in two branch harnesses to centralize upfitter connections to vehicle systems. One branch is coiled between the front seats and the second is coiled on the left side cargo area floor to the rear of the auxiliary battery. Each upfitter branch harness contains blunt-cut wires which are tagged with circuit numbers. The numbered tags are listed in the UPFIT WIRING HARNESS CIRCUIT IDENTIFICATION list provided in this Specification Guide.
<b>WIRING DIAGRAMS</b>	See Wiring Section for descriptions
<b>WIRING PROVISION FOR EMERGENCY LIGHTING</b>	Blunt-cut wire harnesses in front doors and above rear headliner near lift gate for connection to customer outside mirror and rear window emergency lamps
<b>UNIQUE DOOR LOCK FUNCTION (BCV)</b>	Prevents the rear doors from being unlocked with the door handle PEPS button. Also allows customer to customize which doors automatically lock/unlock when shifting out of/into park. Disables rear door courtesy switches.

## STANDARD 9C1 MECHANICAL FEATURES

<b>AIR FILTER</b>	High-capacity
<b>ACTIVE HILL HOLD ASSIST</b>	This feature is designed to prevent the vehicle from rolling, either forward or rearward, during vehicle drive off
<b>ALTERNATOR</b>	250 amps
<b>AXLE</b>	3.23 Ratio
<b>BATTERIES</b>	Primary 900 cca, 95 amp-hour rating with battery rundown protection (may be configured to protect customer installed equipment packaged behind left rear cargo area panel). Isolated, Auxiliary 760 cca, 70 amp-hour battery without battery run-down protection for customer installed equipment. (see SPECIFICATIONS PAGE for details)
<b>BATTERY RELAY</b>	Auxiliary-battery relay connects auxiliary battery to charging system when engine is running.
<b>BRAKES</b>	Police specific brakes with anti-lock calibration and eBoost utilizing 6-piston fixed front Brembo calipers on 410mm rotors (32mm thick), 1-piston sliding rear calipers on 345mm rotors (20mm thick)
<b>COOLING</b>	Heavy-duty high-capacity radiator, electric fans and extended life coolant; coolant hoses are EPDM (ethylene-propylene-diene monomer) rubber; silicone hoses are not required (coolant is DEX-COOL good for 5 years/150,000 miles, protects from -34° F to +265° F and against rust and corrosion)
<b>ENGINE</b>	5.3L V8 VVT (variable valve timing), Direct high-pressure fuel injection with Dynamic Fuel Management (DFM) that allows engine to operate in 17 different cylinder patterns (as few as two cylinders) to optimize power delivery and efficiency. The DFM controller calculates 80 times per second to determine how many cylinders are required to meet the driver's requested torque. (see powertrain page for description and emissions, see also specifications page)
<b>ENGINE OIL COOLER</b>	Engine oil is cooled by passing the fluid through a cooler located in the engine radiator assembly end tank. Engine oil is pumped by the engine oil pump from the driver side of the engine block through piping to an oil-to-coolant heat exchanger located within the passenger side end-tank of the coolant radiator and returned to engine.
<b>EXHAUST</b>	Single system, single-outlet
<b>FRAME</b>	All new fully boxed steel frame with high strength steel roll formed, hydroformed and stamped rails, design optimized for safety and crashworthiness, durability and stiffness.
<b>FILTRATION MONITOR</b>	Engine air filtration monitor
<b>FUEL TANK CAPACITY</b>	24 gallons (90.8 liters)
<b>LIMITED WARRANTY</b>	See Maintenance and Warranty page for information
<b>PROP SHAFT</b>	4-inch diameter aluminum
<b>RADIO SUPPRESSION</b>	The Tahoe vehicle systems are designed to prevent unwanted emissions and to minimize susceptibility and maximize immunity to external emissions (Electromagnetic (EMI) or Radio Frequency (RFI) Interference). Most emergency vehicle communications equipment operating at frequencies in the VHF Band (30-300 MHz) and up to frequencies in the UHF Band (300 MHz-3GHz) will function as intended without enhanced noise suppression. If additional noise suppression grounding is desired, see the Optional Equipment listing for UN9, Radio Suppression Ground Straps
<b>REAR DIFFERENTIAL</b>	Performance-optimized heavy-duty clutch-type limited slip
<b>SKID PLATES, FRONT</b>	Two-piece, heavy-duty aluminum front underbody shield that starts behind the front bumper and attaches to the front fascia. It protects front underbody components and oil pan.
<b>SPARK PLUGS</b>	Extended life - iridium tip
<b>STABILITRAK</b>	Automatically helps enhance control, particularly during emergency maneuvers, by adjusting the brakes and engine torque to help you stay on your intended path. Activates when vehicle sensors detect a difference between the driver's intended path and the direction the vehicle is actually travelling. Includes Traction Control that detects wheel slippage and applies brake pressure and/or reduces engine power to help the driver maintain control when accelerating on wet or snow-covered roads. Includes Brake Assist that senses how hard and fast a driver hits the brake pedal and gives extra braking assistance, if required. Unique calibrations to the PPV Tahoe recognize continuous high performance driving in 2WD or Auto 4WD Mode, and the stability system will automatically enter Pursuit Mode. When engaged the Traction Control OFF light will illuminate. (see Standard Equipment Illustration section for StabiliTrak button location) Pursuit Mode can be disengaged by any of these three methods: -Discontinue high performance driving for approximately 2 minutes -Place transmission into Park for a brief period of time -Turn engine off
<b>STEERING</b>	The Electric Power Steering System consists of a Rack-and-Pinion steering gear assisted by an electronically controlled power steering motor and drive assembly. The steering gear is mechanically connected to the steering wheel system.
<b>SUSPENSION</b>	Heavy-duty police-rated suspension. Full independent suspension with monotube dampers, linear coil springs, 35mm solid front stabilizer bar and 32mm hollow rear stabilizer bar. PPV trim height is 20mm lower than civilian model.
<b>TRAILERING EQUIPMENT<sup>1</sup></b>	SAE Class IV hitch with 2" (51 mm) square receiver. Trailer may weigh up to 6,000 pounds (2,722 kg) with proper hitch selection. See the Owners Manual for additional information.
<b>TRANSMISSION</b>	The 10-speed automatic provides gear ratios that work to improve both fuel economy and acceleration, while also enabling quicker-smoother shifts. Intelligent electronics provide protection against over-revving the engine and can recognize driver intent, whereby holding gears longer when being driven aggressively. This enhances vehicle control while driving through corners and when throttling up at corner exit. Keeping the transmission in one gear instead of upshifting and downshifting avoids "hunting" for a gear state.
<b>TRANSMISSION OIL COOLER</b>	Transmission oil is pumped from the transmission through piping to an oil-to-air heat exchanger and then returns to the transmission. The transmission oil cooler is located in front of the air conditioning condenser as part of the Condenser, Radiator, and Fan Module (CRFM) assembly.

<sup>1</sup> Before you buy a vehicle or use it for trailering, carefully review the Trailering section of the Owner's Manual. The weight of passengers, cargo and options or accessories may reduce the amount you can tow.

## POWERTRAIN

ENGINE				TRANSMISSION		AXLE	
OPTION CODE	TYPE	DISPLACEMENT SYSTEM	FUEL CODE	OPTION CODE	TYPE	OPTION	RATIO
L84	V8	5.3/325	VVT, DI, Dynamic Fuel Management	MHS	10L80 10-Speed auto. with OD	GU5	3.23

## EMISSIONS - MUST BE SPECIFIED

<b>FE9</b>	<b>Emissions</b> , Federal requirements
<b>YF5</b>	<b>Emissions</b> , California state requirements
<b>NE1</b>	<b>Emissions</b> , Connecticut, Delaware, Maine, Maryland, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Rhode Island, Vermont and Washington state requirements
<b>NB8</b>	<b>Emissions override</b> , California (allows a dealer in states that require California emissions - California, Connecticut, Delaware, Maryland, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Rhode Island or Washington - to order Federal emissions for a vehicle that will be registered in a state that has Federal emission requirements). Do not use for vehicles that will be registered in California, Connecticut, Delaware, Maryland, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Rhode Island or Washington. Requires (FE9) Federal emissions requirements. Not available in Maine or Vermont.
<b>NB9</b>	<b>Emissions override</b> , state-specific (for dealers ordering vehicles in (YF5) or (NE1) emission states - California, Connecticut, Delaware, Maine, Maryland, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Rhode Island, Vermont and Washington) Allows a California dealer (YF5 emissions) to order (NE1) emissions with (NB9) emissions override code for registration in (NE1) states; or, a Connecticut, Delaware, Maine, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Rhode Island, Vermont and Washington dealer (NE1 emissions) to order (YF5) emissions with (NB9) emissions override code for registration in California.
<b>NC7</b>	<b>Emissions override</b> , Federal (for vehicles ordered by dealers in Federal emission states with (YF5) or (NE1) emissions - Not required for vehicles being shipped to California, Connecticut, Delaware, Maine, Maryland, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Rhode Island, Vermont or Washington) Requires (YF5) California state emissions requirements or (NE1) Connecticut, Delaware, Maine, Massachusetts, New York, Pennsylvania, Rhode Island or Vermont state emission requirements.

NOTE: The 2022 Chevrolet Tahoe Police Patrol Vehicle and Special Service Vehicle with the 5.3L Engine (L84) with Emission Option Codes:  
 FE9 NAME CERTIFICATION EMISSION, FEDERAL  
 NE1 NAME CERTIFICATION EMISSION, GEOGRAPHICALLY RESTRICTED  
 YF5 NAME CERTIFICATION EMISSION, CALIFORNIA is certified to EPA Tier 3 BIN 70 standards and qualifies as ULEV 70 (Ultra Low Emission Vehicle) under California Air Resources Board (CARB) requirements, meaning it is 50-state certified.  
 EPA engine family or test group: MGMXT05.3388

## TIRES

MANUFACTURER	QUANTITY	SIZE	SPEED RATING	TYPE
Firestone	5	275/55R20	V	All season BW

### NOTE:

**Due to specific requirements for performance durability and safety, GM recommends only the original equipment tires for replacement.**

**Tire Plies = Tread 6 ply; 2 Polyester, 2 Steel, 2 Nylon, Sidewall, 2 Polyester**

**Tire Chains** - Proper size Low Profile chains that add no more than 12 mm thickness to the tire tread and inner sidewall are approved for 2022 Tahoe Police Vehicles if the vehicle has 275/55R20 size tires. If traction devices are used, install them on the rear tires only and tighten them as tightly as possible with the ends securely fastened. Drive slowly and follow the chain manufacturer's instructions. If the chains contact the vehicle, stop and retighten them. If contact continues, slow down until it stops. Tire chains used on a vehicle without the proper amount of clearance can cause damage to the brakes, suspension, or other vehicle parts. The area damaged by the tire chains could cause loss of control and a crash. Driving too fast or spinning the wheels with chains on will damage the vehicle. If traction devices are used, install them on the rear tires only. Use tire chains only where legal and only when necessary.

## 5.3 LITER V8 ENGINE WITH DYNAMIC FUEL MANAGEMENT

Dynamic Fuel Management allows engine to operate in 17 different cylinder patterns (as few as two cylinders) to optimize power delivery and efficiency. The DFM controller calculates 80 times per second to determine how many cylinders are required to meet the driver's requested torque.

## STANDARD HEAVY-DUTY STEEL WHEEL WITH FIRESTONE FIREHAWK PURSUIT TIRE

Firestone Firehawk Pursuit 275/55R20 all-season, V-rated, blackwall. Includes matching spare tire

## SPECIFICATIONS

**1.** Adding non dealer accessories or making modifications to the vehicle can affect vehicle performance, aerodynamics, and overall top speed. **2.** Cargo and load capacity limited by weight and distribution. **3.** Gross Vehicle Weight Rating (GVWR). When properly equipped, includes vehicle, passengers, cargo and equipment. **4.** These maximum payload ratings are intended for comparison purposes only. Before you buy a vehicle or use it to haul people or cargo, carefully review the vehicle loading section of the Owner's Manual and check the carrying capacity of your specific vehicle on the label on the inside of the driver's door jamb. **5.** Before you buy a vehicle or use it for trailering, carefully review the Trailering section of the Owner's Manual. The weight of passengers, cargo and options or accessories may reduce the amount you can tow. **6.** Published dimension indicated is from ground and without optional equipment or accessories. Additional accessories or equipment ordered at the customer's request can result in a minor change in this dimension.

## 2022 TAHOE PPV SPEEDOMETER CERTIFICATION CALIBRATION

To Whom It May Concern:

The speedometer system in the 2022 model year and Police Tahoe vehicle is accurate to +/- 2mph in the temperature range of -23 to 49 °Celsius (-10 to 120 ° Fahrenheit) over the useful life of the vehicle. The speedometer system includes the vehicle integrated speed measurement system and indication of the vehicle speed on the speedometer.

GM specified vehicle maintenance is required to maintain the stated accuracy of the speedometer system. The accuracy of the speedometer system is dependent on and affected by the required vehicle maintenance including; following placard tire inflation pressure of 35 psi, monitoring tire wear as directed by the owner's manual, tire replacement with 275/55 R-20 Firestone tire size and manufacture, maintaining original OEM driveline ratios, maintaining original OEM electronic module calibration files and following vehicle loading limitations.

Regards,

*Howard H. Smith*

Howard Smith  
Police Vehicle Program Engineering  
Manager

## VEHICLE TOUCH SCREEN SETTINGS

## VEHICLE PERSONALIZATION MENU

**The Personalization Menu is accessed by:**

---

Touching the radio screen to display the HOME PAGE

---

Touch the SETTINGS icon and then

---

Touch VEHICLE to display the features

---

**Select from the available features listed to change the item setting.**

---

**Important features in the Menu that can be changed are:**

---

**Rear Seat Reminder<sup>1</sup>**

---

**Collision Detection**

---

**Comfort and Convenience**

---

**Lighting**

---

**Power Locks**

---

See the Owner's Manual for a complete Vehicle Personalization Menu listing of items that may be available for your vehicle.

<sup>1</sup> Does not detect people or items. Always check rear seat before exiting.

## STANDARD FEATURES

## PUSH-BUTTON ELECTRONIC SHIFT

This vehicle is equipped with an electronic transmission with controls mounted next to the instrument panel for easy access. The shift switches are designed to prevent inadvertent shifting out of P (Park) unless the ignition is on and the brake pedal is applied. Push-to-shift transmission technology is intuitive to use, with pull switches for Drive (D) and Reverse (R) and push switches for Park (P), Neutral (N) and Low (L).

Push-button Electronic Shift also enables features previously not possible with a mechanical column shift. These include a back-up to the driver selecting P (Park) and should not be used as the primary method of achieving Park (P). If the vehicle is stopped, in Drive (D)/Low (L) or Reverse (R) and the ENGINE START/STOP button is pressed, the vehicle will turn off and shift the transmission to P (Park) automatically. The vehicle will remain in N (Neutral) if this same procedure is done while the vehicle is in Neutral (N). If the vehicle is sitting, or rolling slowly in Drive (D), Reverse (R), Neutral (N) or Low (L), and the driver exits the vehicle by unbuckling their seatbelt, releasing the brake pedal and opening the driver's door the vehicle will stop, set the parking brake and shift to Park (P). If the door is opened above 5 MPH, the vehicle will not automatically shift to P (Park) when the driver exits.

To drive the vehicle at low speeds with the door open, open the door while the vehicle is in P (Park) and select D (Drive) or R (Reverse). This disables the auto-park feature until the door is closed and then re-opened. The vehicle will not shift into P (Park) if it is moving too fast. Stop the vehicle and shift into P (Park). Also, selecting Park (P) while rolling at low speeds will invoke automatic braking to a stop, before shifting to Park (P). To use Low Mode the vehicle must be in Drive (D) prior to pressing the L (Low) button. Use this mode when driving downhill or towing a trailer to limit the top gear and vehicle speed. When shifting to L (Low), the transmission will shift to a preset lower gear range. Press the + (Plus) button to shift to a higher gear and press the - (Minus) button to shift to a lower gear. L (Low) will prevent shifting to a lower gear range if the engine speed is too high. See Owner's Manual for more information.

# STANDARD SAFETY FEATURES

## STABILITRAK CONTROL

The StabiliTrak Electronic Stability Control and Traction Control System button is located to the left of the steering column on the instrument panel. See also Ride Control Systems in your Owner's Manual for an operation description of the system and related Driver Information Center messages.

## OnStar®

- Voice Command Button
- Blue OnStar® Button
- Emergency Button

This vehicle is equipped with a comprehensive, in-vehicle system that can connect to a live OnStar® Advisor for Emergency, Security, Navigation, Connection, and Diagnostic Services. OnStar® services may require a paid subscription. OnStar® requires the vehicle battery and electrical system, cellular service, and GPS satellite signals to be available and operating. OnStar® acts as a link to existing public emergency service providers. OnStar® may collect information about you and your vehicle, including location information. See OnStar®'s Terms and Conditions and Privacy Statement for more details including system limitations at [www.OnStar.com](http://www.OnStar.com) (U.S.) or [www.OnStar.ca](http://www.OnStar.ca) (Canada). The OnStar® system status light is next to the OnStar® buttons. If the status light is:

- Solid Green: System is on.
- Flashing Green: On a call.
- Red: Indicates a problem.
- Off: System is off. Press the blue OnStar® button twice to speak with an OnStar® Advisor.

Press or call 1-888-4-ONSTAR (1-888-466-7827) to speak to an Advisor.

Press to:

- Make call, end a call, or answer an incoming call.
- Give OnStar® Hands-Free Calling voice commands.

**NOTE: Do not activate OnStar® if you have no plans on using this feature**

## PARK ASSIST (FRT & RR)

The Park Assist system\* may provide assistance to driver while parking. Park Assist uses ultrasonic sensors in the bumper to measure the distance between the vehicle and objects. The system calculates the distance between vehicle and object via measuring the time it takes for the ultrasonic waves to bounce back from the object. Park Assist works only at speeds up to about 11 Km/h (7 mph). An illuminated indicator light in the parking system is ready to operate. The sensors on the bumpers may detect objects up to 1.8m (6 ft) behind and 1.25m (4 ft) in front of the vehicle within 25 cm (10 in) high off the ground and below bumper level. These detection distances may be shorter during warmer or humid weather. Blocked sensors will not detect objects and can also cause false detections. Keep the sensors clean of mud, dirt, snow, ice and slush. Clean sensors after a wash in freezing temperatures.

\*Safety or driver assistance features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Visibility, weather, and road conditions may affect feature performance. Read the vehicle's owner's manual for more important feature limitations and information.

## REAR VISION CAMERA

1. View Displayed by the Camera in Radio Screen
2. Corners of the Rear Bumper

Displayed images may be farther or closer than they appear. The area displayed is limited and objects that are close to either corner of the bumper or under the bumper do not display.

A warning triangle may display on the RVC screen to show where the RPA has detected an object. This triangle changes from amber to red the closer the object.

The camera(s) do not display children, pedestrians, bicyclists, crossing traffic, animals, or any other object outside of the cameras' field of view, below the bumper, or under the vehicle. Shown distances may be different from actual distances. Do not drive or park the vehicle using only these camera(s). Always check behind and around the vehicle before driving. Failure to use proper care may result in injury, death, or vehicle damage.

Note: Safety or driver assistance features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic surroundings and road conditions at all times. Visibility, weather and road conditions may affect feature performance. Read the Owner's Manual for more important limitations and information.

# STANDARD MECHANICAL FEATURES

## HEAVY DUTY BRAKES

Police specific brakes with anti-lock calibration and eBoost utilizing 6-piston fixed front Brembo calipers on 410mm rotors (32mm thick), 1-piston sliding rear calipers on 345mm rotors (20mm thick).

## INDEPENDENT REAR SUSPENSION

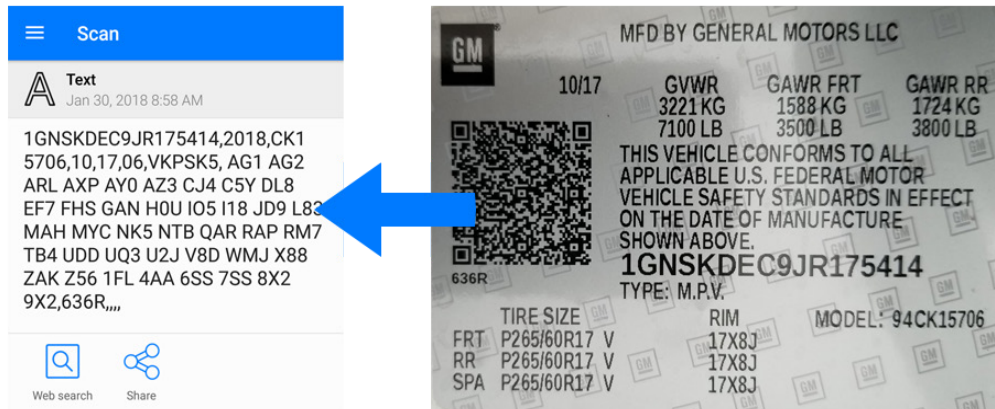

Heavy duty Clutch-type limited-slip differential (green), Fully independent multilink suspension (yellow) utilizing monotube dampers, linear coil springs, and 32mm hollow stabilizer bar

# STANDARD MECHANICAL FEATURES

## SERVICE PARTS IDENTIFICATION LABEL

SPID Label Content Now Included with Certification Label. The Service Parts Identification (SPID) label, often located in the trunk or glovebox of a vehicle, lists a vehicle's VIN, RPO codes and other information that identify the content of the vehicle. Beginning with the 2018 model year, much of this information will be available through a QR code on the Certification label.

Software to read the QR code is commonly available for any Android, iPhone or Windows smartphone. Many basic applications can be downloaded for free. Tested QR code readers that are easy to use include NeoReader by NM LLC, inigma by 3GVision, QR Scanner by Honestly App, QR Droid by DroidLa and Bar-Code by PW2. GM does not recommend any particular software. Once the QR code is scanned, the vehicle information will appear in the following order: VIN, Model Year, Model, Build Month, Year, Engineering Book, Vehicle Order Number, 3 Digit RPO Codes sorted alphanumerically, and the Paint Code (same code appears in the lower left of the QR code).

## ENGINE OIL COOLER

Engine Oil is cooled by passing the fluid through a cooler located in the engine radiator assembly end tank.

Engine oil is pumped by the engine oil pump from the driver side of the engine block through piping to an oil-to-coolant heat exchanger located within the passenger side end-tank of the coolant radiator and returned to engine.

## TIRE PRESSURE MONITOR WITH TIRE FILL ALERT

The Tahoe Police Package is equipped with Tire Pressure Monitoring System (TPMS) which warns of low tire pressure. Refer to your owner's manual for additional information the Tire Pressure Monitor System Programming. The full size spare includes an un-programmed sensor. The spare tire pressure will not be monitored until it is programmed with the dealer service tool.

Tire Fill Alert feature is included in addition to the DIC warning when a tire has low pressure. This feature provides audible and visual indication when air is being added to the low tire to aid in achieving optimal tire pressure.

## TRANSMISSION OIL COOLER

Transmission oil is pumped from the transmission through piping to an oil-to-air heat exchanger and then returns to the transmission. The transmission oil cooler is located in front of the air conditioning condenser as part of the Condenser, Radiator, and Fan Module (CRFM) assembly.

# STANDARD MECHANICAL FEATURES

## ELECTRIC POWER STEERING SYSTEM

The Electric Power Steering System consists of a Rack-and-Pinion steering gear assisted by an electronically controlled power steering motor and drive assembly. The steering gear is mechanically connected to the steering wheel system.

## SKID PLATES

Two-piece, heavy-duty aluminum front underbody shield that starts behind the front bumper and attaches to the front fascia, protects front underbody components and oil pan.

## HUB CAP REMOVAL

The hub cap can be removed for installation of the removed road wheel on the tire hoist using the provided socket removal tool PN 84797942 as shown. Install the socket on the three hub cap fasteners and use the jack tools lug wrench to loosen the hub cap attachment fasteners. The hub cap fasteners can be reinstalled on the road wheel and torqued to 30 Nm

# STANDARD ENTRY & IGNITION

## KEYLESS ACCESS

The remote key must be within 3 ft (1 m) of the liftgate or door being opened or locked. Press the button on the door handle to open.

## REMOTE KEYLESS ENTRY

The Keyless Access system allows for the vehicle entry when the remote is within 3 ft (1 m)

The mechanical key inside the remote key is used for the driver door, glove box and spare tire access.

To remove the mechanical key press the button on the side of the remote key near the bottom and pull the mechanical key out. Never pull the mechanical key out without pressing the button.

## PUSH TO START IGNITION

If key fob not detected, from low fob battery, or radio interference, hold key to start button to start

## PROTECTED IDLE

The Protected Idle Feature allows the vehicle to remain idling but will not allow the transmission to be shifted from Park without a valid key fob.

### ACTIVATING PROTECTED IDLE

#### **Preconditions (All preconditions must be met.)**

Vehicle is in PROPULSION (engine running) state

Vehicle is in Parked State

Vehicle speed is less than 4 kilometers per hour

Valid key fob is present.

#### **Activation**

Press and Hold the Cruise Cancel Switch for 2 seconds

#### **Vehicle Feedback.**

Upon activation of Protected Idle, the Digital Information

Center (DIC) will display the following:

**"Protected Idle ON"**

**"Park in Open Area"**

**"Take Your Key"**

If any of the above preconditions are not met while activating Protected Idle, DIC will display the message:

**"Protected Idle Unavailable"**

### DEACTIVATING PROTECTED IDLE

Valid key fob is present

Press brake pedal and shift out of Park

OR

Press and hold the Cruise Cancel Switch for 2 seconds

OR

Press the Ignition Switch with the Brake Pedal pressed.

DIC messages will turn off, indicating Protected Idle is no longer activated.

### CONDITIONS UNDER WHICH THE PROTECTED IDLE WILL TURN OFF AND VEHICLE WILL TRANSITION TO OFF POWER MODE

Brake pedal pressed without a valid key fob present

OR

Cruise Cancel Switch depressed without a valid key fob present

OR

Ignition Switch pressed without a valid key fob present

OR

With a valid key fob present, ignition switch is pressed and brake pedal is not pressed (the system treats this action as a customer request to turn OFF the vehicle.)

OR

Engine stalls. Horn chirps occur.

OR

Low fuel condition. Horn chirps occur.

### CONDITIONS UNDER WHICH THE PROTECTED IDLE WILL TURN OFF AND VEHICLE WILL TRANSITION TO RUN POWER MODE.

If the Shift Lock mechanism is defeated and shifted Out of Park while the Protected Idle is active, the vehicle will transition to the RUN power mode (the engine will be turned off) and Protected Idle will be deactivated and Horn chirps occur. DIC messages will turn off indicating Protected Idle is inactive.

**ALWAYS PROPERLY SUPERVISE A VEHICLE WHEN PEOPLE OR ANIMALS ARE INSIDE WHEN THE ENGINE IS IDLING.**

# STANDARD ELECTRICAL FEATURES

## OVERHEAD DOME LAMPS

There are dome lamps in the overhead console and the headliner. To change the dome lamp settings, press the following:

- Press and hold any of the overhead console lens to turn all dome lamps on.
- Press and hold any of the overhead consoles lens again to turn all dome lamps off.
- Press OFF to turn off the dome lamps when a door is open. An indicator light on the button will turn on when the dome lamp override is activated.

## STEERING WHEEL BUTTONS

The steering wheel has two button switches on the left backside which have been re-purposed for the operation of aftermarket emergency equipment such as lighting or radios<sup>1</sup>. The switches operate emergency equipment via the Body Control Module (BCM). The top button provides a latching ground signal for lights and siren; the bottom button provides a momentary ground signal for a push to talk two-way radio. The following customer device electrical specifications must be met to avoid damage to the BCM input circuitry:

- BCM can operate a single relay only with a maximum inductive energy of 2 millijoules. Current in Active State: 350 milliamps @ 16 volts. Voltage in Active State: 0.76 volts

## ROUTING GROMMETS

Provides pass throughs for a small number of wires and are located at the left and right sides of the front of dash. Carefully remove or puncture only the nipple portion for the passage of upfitter wires and silicone seal around the wire after installation. Note that a vehicle harness is passing through the grommets and care must be taken to avoid damaging these harnesses especially in the instrument panel interior.

<sup>1</sup> GM is not responsible for the safety or quality of design features, materials or workmanship of any alterations by third parties.

# STANDARD ELECTRICAL FEATURES

## AUXILIARY BATTERY POWER REAR ELECTRICAL CENTER

The auxiliary battery negative battery cable is disconnected during shipment. It must be connected by the customer for proper operation of blunt cut battery feed circuits and auxiliary battery charging system

## CARGO UPFIT BRANCH HARNESS

Cargo area branch with circuits for customer connection<sup>1</sup>. Tagged circuits listed in UPFIT WIRING HARNESS CIRCUIT LIST

## FRONT CENTER UPFIT BRANCH HARNESS

Front Center area upfitter branch harness<sup>1</sup> with tagged circuits for customer connection. View with center front seat removed per Option 5Y1. Branch is forward of seat without Option 5Y1. Tagged circuits are listed in UPFIT WIRING HARNESS CIRCUIT LIST.

## INTEGRATED AUX MICROPHONE WIRING

Hands free auxiliary microphone wiring has been provided for usage with after-market 2 way police radios. It's designed to be used with the re-purposed LH steering wheel lower button and associated momentary grounding output circuit number 8021 BN/GY wire. It's further enhanced with the OEM AM/FM radio mute feature using circuit number 10137 GY/WH wire connected to the aftermarket 2 way radio unit.

- Connector PN 15533335 and terminal PN 82400629 are needed to mate with the OEM provided headliner connector
- See adjacent photo for the location of the OEM provided circuit branch/connector in the headliner.

<sup>1</sup>. GM is not responsible for the safety or quality of design features, materials or workmanship of any alterations by third parties.

# STANDARD ELECTRICAL FEATURES

## WIRING PROVISIONS FOR 12-VOLT BATTERY POWER SUPPLY

The vehicle is equipped with wiring provisions for connecting the Auxiliary Battery to customer installed equipment. Upfitter wiring harnesses are located between the front seats and at the left side of the cargo area, rearward of the auxiliary battery. Wire circuits in the front (CONSOL) and rear (CARGO) upfitter harnesses are identified by numbered tags on the wires. The upfitter circuits are identified in the Upfit Wiring Harness Circuit Identification chart. A wiring diagram for the control relays is provided in this specification document.

The Primary Battery provides 12 volt power to four relays which are controlled by customer grounding to the upfit relays via circuits 8895, 8896, 8897 and 8898. Customer equipment load is connected to the control relay contacts via circuits 8911, 8912, 8913 or 8914 listed in the Upfit Wiring chart. Ground circuit wires are also found in the Wiring Chart.

Refer also the the Wiring Chart for Vehicle Systems Signals for Vehicle Speed, Interruptible Retained Accessory Power\*, Run/Crank Ignition Power, Driver Door Ajar, Surveillance On/Off, Brakes Applied, Park Enable and IP Dimming.

\* See Page 45 of this guide for detail

### AUXILIARY BATTERY FUSE BLOCK X50EA

X1 X4 = Auxiliary Battery Relay KR81

X2 Fuse and Upfit Circuit Designations

X3 X1 = F1BB 642 100A  
X2 = F2BB 842 100A  
X3 = F3BB 742 50A

### RADIO MUTE FEATURE

A Radio Mute circuit (#10137) is provided to permit muting of the vehicle radio when an emergency vehicle radio is transmitting. It is the Gray/White blunt cut wire located between the front seats near the upfitter branch harness.

The following customer device electrical specifications must be met to avoid damage to the vehicle Exterior Lighting Module (ELM) input circuitry:

- No inductance allowed
- Maximum Load Capacitance: 600 nano-farads.
- Maximum Closed switch contact resistance: 20 ohms
- Minimum Open switch contact resistance: 100,000 ohms

## EXTERIOR LAMPS EMERGENCY FLASHING SYSTEM

Standard 6J7 provides headlamp high beam flashing and rear lamps flashing via the Exterior Lighting Module (ELM). The exterior lamps flashing is activated by customer switching of ground circuits in the upfitter harness located between the front seats (CONSOL) in the rear cargo area (CARGO).

Headlamp high beam flashing is activated via connection of upfitter circuit 8863 to ground via customer switching. The headlamps and high beam indicator will flash alternately at 3 flashes per second. Rear lamps flashing is chosen by the customer to flash either Red-White alternately (Brake lamps and Reverse Lamps, grounding upfitter circuit 8865) or Red-Red alternately (Left and Right Brake Lamps, grounding upfitter circuit 8864). The rear lamps flash rate is 3 per second. Depressing the Brake pedal will override the brake lamp flashing and placing the transmission in Reverse will override the reverse lamps flashing.

During daylight conditions, the Daytime Running Lamps (DRL) are automatically turned off whenever the Lamp Flashing System is activated. During night time conditions the low beam headlamps and tail lamps automatically turn on while the high beams flash. Turning on the high beam headlamps will override high beam flashing. If Option 9G8 is present the low beam head lamps and tail lamps must be manually activated. The Center Mounted Stop Lamp will operated only when the service brakes are applied.

NOTES:

- Wiring connection or splice changes are to be removed before the vehicle is returned to civilian use.
- For wiring diagram see Wiring Section

# STANDARD ELECTRICAL FEATURES

## WIRING PROVISION FOR OUTSIDE MIRRORS AND CARGO SIDE WINDOWS

Wiring provisions are provided for connection to customer-provided LED emergency lighting to be installed on the outside rear view mirrors and on the rear of the cargo area side windows. Blunt-cut wires are located in the front doors and above the cargo area headliner, forward of the lift gate. The wire circuits are included in the CONSOL and CARGO Upfitter branch harnesses for connection to customer- installed strobe lights, strobe power and flash controls (circuits 8870-8889).

## SURVEILLANCE FEATURE MANUAL LAMP CONTROL AND 9G8

The headlamp control on the driver's side of the instrument panel operates the exterior lamps. If your Tahoe does not have option 9G8, DELETE DAYTIME RUNNING LAMPS and AUTOMATIC HEADLAMPS, the Daytime Running Lamps and Automatic Headlamps can be turned OFF for one ignition cycle by rotating the headlamp control knob momentarily counter-clockwise. See also Section 3 of your Tahoe Owner's Manual.

Surveillance Feature - The Body Control Module (BCM) is calibrated to disable the exterior and interior automatic lighting. When ground is applied to upfit circuit wire 6821 (see Upfit Wiring Harness Circuit List) in the front or cargo upfitter branch harness via a customer-provided switch, automatically controlled lighting is disabled or dimmed to a Federally regulated level.

Option SEO 9G8 - Delete Daytime Running Lamps and Automatic Headlamps. This option disables the Daytime Running Lamps and Automatic Headlamps control feature. Exterior lamps are only manually controlled (Option 9G8 is not available in Canada).

When the headlamp switch is in Auto with 9G8 installed, the instrument cluster, radio display and air conditioning illumination remains at daytime intensity and are dimmable only when the headlamp switch is rotated to the Parking Lamps or Headlamps positions. If SEO 9G8 is not installed, the displays are dimmable with the Headlamp switch in the AUTO position. The instrument cluster, radio and AC displays will dim if the Surveillance Feature is activated as described above.

NOTE: Wiring connection or splice changes are to be removed before the vehicle is returned to civilian use.

AVAILABLE EXTERIOR COLORS ACTUAL COLORS MAY VARY

 G48 Auburn Metallic	 GBA Black	 GLU Midnight Blue Metallic	 GJW Empire Beige Metallic
 G9K Satin Steel Metallic	 G6M Dark Ash Metallic	 GAZ Summit White	 GSK Cherry Red Tintcoat Additional Charge.

## FRONT SEATS AND INTERIOR TRIM

## STANDARD FRONT ROW SEATING

**AZ3 40/20/40 INDIVIDUAL SEATS FOR 3 FRONT OCCUPANT** (Center seat can be unbolted for removal).

STANDARD 10-way power driver seat, includes power lumbar with power recline and STANDARD 8-way power passenger seat with power lumbar. Center seat back folds-down for access to armrest and cup holders. Bottom center seat cushion lifts for storage. 120v Power output mounted on backside of seat.

Seat Code	Seat Trim	Color	Color Code
AZ3	Cloth	Jet Black	HOU

- Front cloth and vinyl rear seat combination is available by ordering option 5T5 and requires Jet Black (HOU)
- Center seat can be unbolted for removal

**5Y1**

## OPTIONAL FRONT ROW SEATING

**20% FRONT CENTER SEAT DELETE WITH CLOTH 40/40 INDIVIDUAL SEATS (AZ3 & OPTION 5Y1)**

Deletes center seat to provide 15" of open floor space between driver and passenger seats. STANDARD 10-way power driver seat includes power lumbar with power recline and STANDARD 8-way power passenger seat with power lumbar.

A separate cable and connection kit for the 120v auxiliary power is provided loose in the vehicle when center seat is deleted.

Seat Code	Seat Trim	Color	Color Code
AZ3 & 5Y1	Cloth	Jet Black	HOU

- Front cloth and vinyl rear seat combination is available by ordering option 5T5 and requires Jet Black (HOU)
- Requires (BG9) Black rubberized vinyl floor covering

**A50**

## OPTIONAL FRONT ROW SEATING

**A50 SEATS, FRONT BUCKET** Includes Frontal airbags for driver and front outboard passenger; Seat-mounted side-impact airbags for driver and front outboard passenger; Head-curtain airbags for all rows at outboard seating positions. Floor console (DO7) without driver inboard seat-mounted side-impact airbag. Floor console includes two USB data ports: one type A and one type C. Option (5T5) Vinyl second row seat is not available when Option A50 is ordered. Always use seat belts and child restraints. Children are safer when properly secured in a rear seat in an appropriate child restraint. See the Owner's Manual for more information.

Seat Code	Seat Trim	Color	Color Code
5Y1	Cloth	Jet Black	HOU

- Option 5T5 vinyl second row seat not available when Option A50 is ordered.
- Console cannot be deleted
- Requires PQA Safety Package

REAR SEATS AND INTERIOR TRIM

STANDARD CLOTH SECOND ROW SEATING

**CLOTH SECOND ROW 60/40 SPLIT-FOLDING BENCH SEAT (AT6)**

Includes folding center armrest with cup holder

Seat Code	Seat Trim	Color	Color Code
AT6	Cloth	Jet Black	HOU

- Color is based on front seat choice

**5T5** OPTIONAL VINYL SECOND ROW SEATING

**OPTIONAL - SEO 5T5 VINYL REAR SEAT**

Vinyl Second Row 60/40 Split-folding Bench Seat (Option 5T5)

Seat Code	Seat Trim	Color	Color Code
5T5	Vinyl	Jet Black	HOU

- Front cloth and vinyl rear seat combination is available by ordering option 5T5 and requires Jet Black (HOU)
- Does not include rear passenger armrest or cup holders
- Not available with (A50)

**ATZ** OPTIONAL SECOND ROW SEAT DELETE

**OPTIONAL - ATZ SEAT DELETE, SECOND ROW**

This feature deletes the 2nd row seat and seat belts from the vehicle to allow the customer to install aftermarket equipment such as a Hazmat seat or K9 kennel in the vehicle. Option VXT, Incomplete Vehicle is included and only available with ATZ. Customer or upfitter must meet FMVSS certification requirements for Incomplete Vehicle. This option is only available in the US and Canada.

## OPTIONAL INTERIOR FEATURES

<b>5J1</b>	<b>CALIBRATION</b> - Keyless remote panic button and exterior lights/horn disable
<b>B30</b>	<b>CARPET FLOOR COVERING</b> - Color-keyed carpeting, includes front and second row color keyed floor mats. Horizontal surface of cargo area will be covered in vinyl. Center Seat Delete (5Y1) is not available with (B30) carpeting..
<b>S10</b>	<b>CENTER CONSOLE LOCKABLE STORAGE BOX</b> - Requires (A50) front bucket seats. Not available with (AZ3) 40/20/40 split-bench front seat.
<b>RIA</b>	<b>FLOOR LINERS, ALL-WEATHER</b> - 1st and 2nd rows. Not available with (BG9) Black rubberized vinyl floor covering,
<b>AAK</b>	<b>FLOOR LINER ALL WEATHER</b> - 1st, 2nd and 3rd rows. Not available with (BG9) Black rubberized vinyl floor covering, (VAV) all-weather floor mats, or (RIA) 1st and 2nd row all-weather floor liners.
<b>5Y1</b>	<b>FRONT CENTER SEAT (20% SEAT) DELETE</b> - Power driver and passenger bucket seats in base cloth trim. Derived from RPO (AZ3) 40/20/40 split-bench seat with the 20% section removed, which also removes the auxiliary power outlet, The 110 volt AC outlet. The 110 volt AC outlet and harness in the center seat section are shipped loose in a bag for customer connection. Does not include a floor console. All exposed floor area will remain untrimmed. Requires (BG9) Black rubberized vinyl floor covering. Not available with (A50) front bucket seats or (B30) color-keyed carpeting floor covering.
<b>S08</b>	<b>HIGHWAY SAFETY KIT</b> - Includes bowtie logo on case
<b>6E2</b>	<b>KEYS/FOBS</b> - All vehicles in fleet, provides 2 fobs and 2 mechanical keys with a specific code that is common to the door lock and ignition of all the vehicles in the vehicle fleet. This code is an alternate to SEO 6E8 for KEYS/FOBS and mechanical keys
<b>6E8</b>	<b>KEYS/FOBS</b> - All vehicles in fleet, provides 2 fobs and 2 mechanical keys with a specific code that is common to the door lock and ignition of all the vehicles in the vehicle fleet. This code is an alternate to SEO 6E2 for key fobs and mechanical keys.
<b>AMF</b>	<b>KEY FOBS</b> - Fleet Package includes 4 additional key fobs and mechanical keys. Key fobs are not programmed. Each additional key fob must be programmed together by the customer or a dealer at customer expense. Key fob programming is not a warranty item. See programming remote key fob instructions shown on OPTIONAL EQUIPMENT page. Requires 6E2/6E8
<b>T53</b>	<b>LAMPS</b> - Alternate flashing Red and Blue rear compartment liftgate warning lamps (visible when liftgate is open) and controlled by liftgate -mounted switch or ground wire in upfitter harness connected to customer switching.
<b>6C7</b>	<b>LIGHTING</b> - Red and white LED front auxiliary dome is located on headliner between front row seats. The auxiliary lamp is wired independently from standard dome lamp
<b>RIK</b>	<b>NAMEPLATES</b> - Black
<b>W2D</b>	<b>NET</b> - Vertical cargo net
<b>UDA</b>	<b>ONSTAR</b> - Deactivated (does not delete Bluetooth). Deletes (UE1) OnStar and (VV4) Wi-Fi Hotspot capable.
<b>DRZ</b>	<b>REAR CAMERA MIRROR<sup>1</sup></b> - Inside rearview auto-dimming with full camera display. Includes (CWA) Rear Camera Mirror Washer. Not available with PQA Safety Package
<b>6N6</b>	<b>REAR DOOR LOCKS AND HANDLES INOPERATIVE</b> - Rear power locks are inoperable at rear door but operate from drivers position, rear doors can be opened only from outside the vehicle
<b>6N5</b>	<b>REAR DOOR WINDOW SWITCHES INOPERATIVE</b> - Rear windows only operate from drivers position. Window lockout switch remains illuminated in all positions when equipped with this feature
<b>SFJ</b>	<b>REFLECTIVE WINDOW SHADE</b>
<b>BTV</b>	<b>REMOTE VEHICLE STARTER SYSTEM</b> - Includes remote keyless entry
<b>PQA</b>	<b>SAFETY PACKAGE<sup>1</sup></b> - Includes (UEU) Forward Collision Alert, (UHX) Lane Keep Assist with Lane Departure Warning, (UHY) Automatic Emergency Braking, (UKJ) Front Pedestrian Braking and (UE4) Following Distance Indicator. Not available with (DRZ) Rear Camera Mirror.
<b>ATZ</b>	<b>SEAT DELETE, SECOND ROW</b> - This feature deletes the 2nd row seat and seat belts from the vehicle to allow the customer to install aftermarket equipment such as a seat or kennel in the vehicle. Option VXT, Incomplete Vehicle is included and only available with ATZ. Customer or upfitter must meet FMVSS certification requirements for Incomplete Vehicle. This option is only available in the US and Canada.
<b>A50</b>	<b>SEATS, FRONT BUCKET<sup>2</sup></b> - Includes Frontal airbags for driver and front outboard passenger; Seat-mounted side- impact airbags for driver and front outboard passenger; Head-curtain airbags for all rows at outboard seating positions. Floor console (DO7) without driver inboard seat-mounted side-impact airbag. Floor console includes two USB data ports: one type A and one type C. Requires (PQA) safety package. Option (5T5) Vinyl second row seat is not available when Option A50 is ordered. Always use seat belts and child restraints. Children are safer when properly secured in a rear seat in an appropriate child restraint. See the Owner's Manual for more information.
<b>5T5</b>	<b>SEAT</b> - Front cloth with vinyl rear seat (see front seats and interior trim illustration page for description)
<b>VRS</b>	<b>SHADE</b> - Cargo security
<b>UTQ</b>	<b>THEFT DETERRENT SYSTEM</b> - Content, disable, the alarm and horn become nonfunctional in an attempt of theft to the vehicle

<sup>1</sup>. Safety or driver assistance features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Visibility, weather, and road conditions may affect feature performance. Read the vehicle's owner's manual for more important feature limitations and information.

## OPTIONAL EXTERIOR FEATURES

<b>9G8</b>	<b>HEADLAMPS, DELETE DAYTIME RUNNING LIGHTS AND AUTOMATIC HEADLAMPS</b> - Daytime Running Lamps and automatic headlamp control delete, deletes standard Daytime Running Lamps and automatic headlamp control features.
<b>5T4</b>	<b>EXTERIOR BODY COLORED PARTS</b> - Special paint WA 9260 , Victory Red painted parts will be front fascia, rear fascia, tailgate applique, liftgate handle and door handles. Black parts will be D-pillar applique, rear spoiler, mirrors, ultrasonic park assist sensors and OnStar antenna.
<b>9V2</b>	<b>EXTERIOR BODY COLORED PARTS</b> - Special paint WA 5665 , MSP blue painted parts will be front fascia, rear fascia and tailgate applique. Black parts will be liftgate handle, door handles, D-pillar applique, rear spoiler, mirrors, ultrasonic park assist sensors and OnStar antenna.
<b>9W3</b>	<b>EXTERIOR BODY COLORED PARTS</b> - Special paint WA 253A, Wheatland Yellow. Black parts will be front fascia, rear fascia, tailgate applique, liftgate handle, door handles, D-pillar applique, rear spoiler mirrors, ultrasonic park assist sensors and OnStar antenna.
<b>9V7</b>	<b>EXTERIOR BODY COLORED PARTS</b> - Special paint WA 722J , Dark Blue Metallic painted parts will be high approach front fascia, rear fascia and tailgate applique. Black parts will be liftgate handle, door handles, D-pillar applique, rear spoiler, mirrors, ultrasonic park assist sensors and OnStar antenna.
<b>9V5</b>	<b>EXTERIOR BODY COLORED PARTS</b> - Special paint WA 9015, Woodland Green. Black parts will be front fascia, rear fascia, tailgate applique, liftgate handle, door handles, D-pillar applique, rear spoiler mirrors, ultrasonic park assist sensors and OnStar antenna..
<b>AKP</b>	<b>GLASS</b> - Solar absorbing, non tinted
<b>VK3</b>	<b>LICENSE PLATE</b> - Front mounting package (included on orders with ship-to states that require front license plate)
<b>6JE</b>	<b>LAMP PACKAGE, BLUE</b> - Headlamp and tail lamp LED strobe, Blue Driver-side and front passenger-side. Not available with SEO (6J8) Lamp Package, White, SEO (6J9) Lamp Package, Red or SEO (6JG) Lamp Package, Red/Blue
<b>6J9</b>	<b>LAMP PACKAGE, RED</b> - Headlamp and tail lamp LED strobe, Red Driver-side and front passenger-side. Not available with SEO (6J8) Lamp Package, White, SEO (6JE) Lamp Package, Blue or SEO (6JG) Lamp Package, Red/Blue
<b>6JG</b>	<b>LAMP PACKAGE, RED/BLUE</b> - Headlamp and tail lamp LED strobe, Red Driver-side and Blue front passenger-side. Not available with SEO (6J8) Lamp Package, White, SEO (6JE) Lamp Package, Blue or SEO (6J9) Lamp Package, Red
<b>6J8</b>	<b>LAMP PACKAGE, WHITE</b> - Headlamp and tail lamp LED strobe, White Driver-side and front passenger-side. Not available with SEO (6JE) Lamp Package, Blue, SEO (6J9) Lamp Package, Red or SEO (6JG) Lamp Package, Red/Blue
<b>RIK</b>	<b>NAMEPLATES</b> - Black
<b>V76</b>	<b>RECOVERY HOOKS<sup>1</sup>, BLACK</b> - Two front frame-mounted. Required on all models sold to Alaska, Guam, Hawaii, Puerto Rico and Virgin Islands. All Tahoe 9C1 Police and 5W4 Special Service Vehicles will include front fascia recovery hook openings but do not include the hooks. See optional equipment illustrations section. NOTE: Front recovery hooks are for vehicle recovery only. To avoid the risk of injury, never use recovery hooks to tow a vehicle.
<b>TGK</b>	<b>SPECIAL PAINT SOLID</b> - Special paint, one color. Required with any special paint selection. Refer to individual special paint SEO codes for details on body colored non-sheet metal parts. May require extended lead time.
<b>TGL</b>	<b>SPECIAL PAINT TWO TONE</b> - Body in black (GBA) with summit white (GAZ) hood. No other combinations available.
<b>VQK</b>	<b>SPLASH GUARDS</b> - Molded black
<b>7X3</b>	<b>SPOTLAMP</b> - Left hand, pillar-mounted unity, 6-inch with LED lamps; independently fused
<b>7X2</b>	<b>SPOTLAMPS</b> - Left and right hand, pillar-mounted unity, 6-inch with LED lamps; independently fused NOTE: Factory installation of spotlamps are recommended. Special tooling is used to locate and drill the spotlamp shaft hole in the pillars. (Interior trim covers provided with factory installed lamps are not available as service parts). Field installation of spotlamps must not interfere with proper deployment of the roof rail mounted head-curtain airbags in the event of a crash.

## OPTIONAL ELECTRICAL FEATURES

<b>UN9</b>	<b>RADIO SUPPRESSION</b> - Additional ground straps shipped loose to be installed by customer.
<b>WX7</b>	<b>WIRING</b> - For upfitter connection to front door speakers.
<b>6J3</b>	<b>WIRING</b> - For grille lamps and siren speaker
<b>6J4</b>	<b>WIRING</b> - Horn Transfer Loop wire permits customer connection of a switch to operate the vehicle horn or a customer-provided siren system via the steering wheel horn button

## OPTIONAL MECHANICAL FEATURES

	<b>TRANSFER CASE - REQUIRES CK10706</b> - Single-Speed Autotrac with Auto 4WD, 4HI and 2WD electronic settings (includes Terrain Mode). Does not include neutral setting and cannot be dinghy towed.
<b>VQZ</b>	<b>EXHAUST TIP</b> - Polished
<b>R9Y</b>	<b>FLEET MAINTENANCE CREDIT</b> - This option code provides a credit in lieu of the free oil changes, tire rotations and inspections for one maintenance service otherwise provided during 1st year of ownership. The invoice will detail the applicable credit. The customer will be responsible for all oil change, tire rotations and inspections costs for this vehicle. Requires one of the following Fleet or Government order types: FBC, FBN, FCA, FCN, FEF, FLS, FNR, FRC or FGO. Not available with FDR order types.
<b>VSY</b>	<b>HEATER</b> - Engine block (dealer installed) late availability
<b>PDC</b>	<b>PERFORMANCE UPGRADE PACKAGE</b> -Includes (WBC) Cat-Back Performance Exhaust (increased horsepower and torque, decreased backpressure) and Performance Air Intake System that features a clear plastic cover and a bright red filter element with 13% reduction in intake pressure. This package is dealer-installed. Not available with (VQZ) polished exhaust tip, LPO or (VTA) Black exhaust tip, LPO.

## OPTIONAL SHIP THRU

<b>VPV</b>	<b>SHIP THRU TO KERR INDUSTRIES</b> - Included with SEO (6C7) red and white front auxiliary dome lighting, SEO (6N6) door locks and handles, SEO (7X2) left- and right-hand spotlamps, SEO (7X3) left-hand spotlamp, SEO (T53) alternate flashing Red & Blue rear compartment lid warning lamps, SEO (UN9) Radio Suppression Package, SEO (6J3) grille lamps and siren speakers wiring, SEO (6J4) horn and siren circuit wiring and SEO (WX7) auxiliary speaker wiring.
------------	---

1. To avoid the risk of injury, never use Recovery Hooks to tow a vehicle. For more information, see the Recovery Hooks section of your Owner's Manual.

# OPTIONAL SAFETY PACKAGE

## PQA

## INCLUDES THE FOLLOWING FEATURES

### UEU

### FORWARD COLLISION ALERT

The Forward Collision Alert (FCA) system may help to avoid or reduce the harm caused by crashes with vehicles being followed. When approaching a vehicle ahead too quickly, FCA provides a red flashing alert on the windshield and rapidly beeps. FCA also lights an amber visual alert if following another vehicle much too closely. FCA detects vehicles within a distance of approximately 60m (197 ft) and operates at speeds above 8 km/h (5 mph).

**Warning** FCA is a warning system and does not apply the brakes. When approaching a slower-moving or stopped vehicle ahead too rapidly, or when following a vehicle too closely, FCA may not provide a warning with enough time to help avoid a crash. It also may not provide any warning at all. FCA does not warn of pedestrians, animals, signs, guardrails, bridges, construction barrels, or other objects. Be ready to take action and apply the brakes. FCA can be disabled with either the FCA steering wheel control or, if equipped, through vehicle personalization. .

**Detecting the Vehicle Ahead** FCA warnings will not occur unless the FCA system detects a vehicle ahead. When a vehicle is detected, the vehicle ahead indicator will display green. Vehicles may not be detected on curves, highway exit ramps, or hills, due to poor visibility; or if a vehicle ahead is partially blocked by pedestrians or other objects. FCA will not detect another vehicle ahead until it is completely in the driving lane.

**FCA** does not provide a warning to help avoid a crash, unless it detects a vehicle. FCA may not detect a vehicle ahead if the FCA sensor is blocked by dirt, snow, or ice, or if the windshield is damaged. It may also not detect a vehicle on winding or hilly roads, or in conditions that can limit visibility such as fog, rain, or snow, or if the headlamps or windshield are not cleaned or in proper condition. Keep the windshield, headlamps, and FCA sensors clean and in good repair.

### UE4

### FOLLOWING DISTANCE INDICATOR

The following distance to a detected moving vehicle ahead in your path is indicated in following time in seconds on the Driver Information Center (DIC). The minimum following time is 0.5 seconds away. If there is no vehicle detected ahead, or the vehicle ahead is out of sensor range, dashes will be displayed.

Safety or driver assistance features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Visibility, weather, and road conditions may affect feature performance. Read the vehicle's owner's manual for more important feature limitations and information.

### UHY

### AUTOMATIC EMERGENCY BRAKING

The brakes may be applied automatically in potential collision situations to help reduce damage or help avoid collisions with vehicles directly ahead.

When the system detects a vehicle ahead in your path that is traveling in the same direction that you may be about to crash into, it can provide a boost to braking or automatically brake the vehicle. This can help avoid or lessen the severity of crashes when driving in a forward gear. Depending on the situation, the vehicle may automatically brake moderately or hard. This forward automatic braking can only occur if a vehicle is detected. This is shown by the Forward Collision Alert.

To set the Automatic Emergency Braking and Forward Collision Alert systems to Alert and Brake, Alert, or Off, go to **Settings> Vehicle> Collision/Detection Systems> Forward Collision System**.

### UHX

### LANE KEEP ASSIST WITH LANE DEPARTURE WARNING

**Lane Keep Assist** (LKA) may help avoid crashes due to unintentional lane departures. It may also provide a Lane Departure Warning (LDW) system alert as the lane marking is crossed. The LKA system will not assist or provide an LDW alert if it detects that you are actively leaving your lane. Override LKA by turning the steering wheel. LKA uses a camera to detect lane markings between 60 km/h (37 mph) and 180 km/h (112 mph).

**How the System Works** The LKA camera sensor is on the Windshield. To turn LKA on and off, press to the left of the steering wheel. When on, is green if LKA is available to assist and provide LDW alerts. It may assist by gently turning the steering wheel and display as amber if the vehicle approaches a detected lane marking without using a turn signal in that direction. It may also provide an LDW alert by flashing amber as the lane marking is crossed. Additionally, there may be three beeps.

**Take Steering** The LKA system does not continuously steer the vehicle. If LKA does not detect active driver steering, an alert, chime, or DIC message may be provided. Steer the vehicle to dismiss.

### UKJ

### FRONT PEDESTRIAN BRAKING

The FPB system may help avoid or reduce the harm caused by front-end crashes with nearby pedestrians when driving in a forward gear. FPB displays an amber indicator, when a nearby pedestrian is detected ahead. When approaching a detected pedestrian too quickly, FPB provides a red flashing alert on the windshield and rapidly beeps. FPB can provide a boost to braking or automatically brake the vehicle.

The FPB system can detect and alert to pedestrians in a forward gear at speeds between 8 km/h (5 mph) and 80 km/h (50 mph). During daytime driving, the system detects pedestrians up to a distance of approximately 40 m (131 ft). during nighttime or low visibility conditions, system performance is very limited.

## OPTIONAL FEATURES

**DRZ**

### REAR CAMERA MIRROR

Inside rearview auto-dimming with full camera display. Includes (CWA) Rear Camera Mirror Washer. Not available with (PQA) Safety Package

This automatic dimming mirror provides a wide angle camera view of the area behind the vehicle. Pull the tab to turn on the display. Push the tab to turn it off. When off the mirror is automatic dimming. Adjust the mirror for a clear view of the area behind the vehicle while the display is off.

**WARNING:** The Rear Camera Mirror (RCM) has a limited view. Portions of the road,

vehicles, and other objects may not be seen. Do not drive or park the vehicle using only this camera. Objects may appear closer than they are. Check the outside mirrors or glance over your shoulder when making lane changes or merging. Failure to use proper care may result in injury, death, or vehicle damage.

The Rear Camera Mirror may not work properly or display a clear image if.

- There is glare from the sun or headlamps.

- This may obstruct objects from view. If needed, push the tab to turn off the display.

- Dirt, snow, or other debris blocks the camera lens. Clean the lens with Rear Camera Washer or a soft damp cloth.

- The camera's mounting on the vehicle has been damaged, and/or the position or the mounting angle of the camera has changed.

Safety or driver assistance features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Visibility, weather, and road conditions may affect feature performance. Read the vehicle's owner's manual for more important feature limitations and information.

## OPTIONAL EQUIPMENT

**CK10706**

4WD POWERTRAIN

TRANSFER CASE - Requires CK10706 - Single-Speed Autotrac with Auto 4WD, 4HI and 2WD electronic settings (includes Terrain Mode). Does not include neutral setting and cannot be dinghy towed.

## OPTIONAL EQUIPMENT

**V76**

### RECOVERY HOOKS

Two black front frame mounted. <sup>1</sup>

**NOTE:** Front recovery hooks are for vehicle recovery only. To avoid the risk of injury, never use recovery hooks to tow a vehicle.

**VQK**

### SPLASH GUARDS, MOLDED

Black finish

**AMF**

### PACKAGE OF FOUR UNPROGRAMMED KEYS/FOBS

Requires 6E2/6E8

An unlimited number of KEYS/FOBS can be learned for Keyless start and Keyless open, only the last 8 KEYS/FOBS learned will have the key fob buttons work for that vehicle. The programming procedure for SEO AMF KEYS/FOBS requires that one previously learned key fob be present in the vehicle.

One learned key fob is required for this procedure.

**NOTE:** If a previously learned key fob is not available, the programming of the new KEYS/FOBS must be performed by a dealer using the Service Programming System (SPS). Key fob programming is not a warranty item and programming is conducted by the customer or at a dealer at customer expense.

Vehicles ordered with (BTV) remote start will include KEYS/FOBS with remote start button.

#### PROGRAMMING PROCEDURE:

1. Using the learned key fob, turn the ignition ON. The transmission selector must be in PARK.
2. Using the SELECT and other buttons on the right side of the steering wheel, open the Driver Information Center (DIC) Main Menu. Scroll down to Main Menu item OPTIONS with the lower steering wheel button and then SELECT. Scroll to REMOTE KEY RELEARN and Select START. The DIC will display LEARNING ACTIVE.
3. Place the new key fob to be learned on top of the start button with buttons facing up and key head facing driver side
4. Press the start button to learn the key fob. The DIC will display "ready for Key #" where # is the next key fob to be learned.
5. Verify that key fob is learned by operating the door locks remotely.
6. Repeat Step 3 through 5 to learn the next key fob.
7. To exit key fob learning mode, press and hold the start button for approximately 15 seconds.

**6E2**

### FLEET KEY & REMOTE FOB

**6E8**

The fleet key fob feature allows the user to program a fob to be recognized by a particular vehicle for full remote functionality (Lock/Unlock and Remote Start if equipped). Use of this remote on other fleet keyed-a-like vehicles will be limited to unlocking the driver's door by pressing the exterior door handle button and starting the vehicle once inside. The remote lock/unlock and remote start (if equipped) buttons will not function unless the operator uses the Driver Information Center (DIC) to program the newly introduced fob. Note that a vehicle is only capable of recognizing the last 8 key fobs programmed for full remote capability. Adding a 9th remote fob will bump fob #1 remote functionality until it is reprogrammed through the DIC, adding remote #1 back into the DIC will bump fob #2 remote button functionality, etc. There are no limitations to the amount of fleet keys that will be recognized to access and start the vehicle. Programming a newly introduced fleet fob through the DIC is required to use the Protected Idle feature.

<sup>1</sup> Never pull on recovery hooks from the side. The hooks could break and you and others could be injured. When using recovery hooks, always pull the vehicle from the front.

## OPTIONAL EQUIPMENT

7X2

### SPOTLAMPS

7X3

- 7X3 Spotlamp left hand, pillar-mounted unity, 6-inch with LED lamps; independently fused
- 7X2 Spotlamps left and right hand, pillar-mounted unity, 6-inch with LED lamps; independently fused

#### NOTE:

- For fuse location see Wiring Section
- Factory installation of spotlamps is recommended. Special tooling is used to locate and drill the spotlamp shaft hole in the windshield pillars.
- A customer furnished spotlamp assembly must be installed to avoid interference with proper deployment of roof rail mounted head-curtain and instrument panel passenger side airbags

T53

### LIFTGATE WARNING LAMPS

Red and Blue flashing LED warning lamps are mounted in the bottom of the liftgate and alternately flash when the liftgate is opened. A switch mounted near the left warning lamp turns the lamps on and off. The switch is shipped separately and must be customer-installed in the liftgate. The switch is attached to the left side cargo area upfitter harness stowed to the rear of the auxiliary battery. (see photo) Install the switch by removing the cover from the mounting hole in the trim near the left warning lamp. Extract the switch connector through the trim hole and connect to the switch. Install the switch and connector assembly by snapping the switch into the trim hole. Operate the switch to turn the warning lamps ON and to turn the lamps OFF verify operation of the lamps.

The warning lamps can also be operated by connecting a circuit wire (8868) in the UPFIT WIRING HARNESS LIST to a customer emergency lighting controller. When circuit 8868 is grounded by the customer controller the lamps will flash. The liftgate switch can turn off the lamps when being flashed by the customer controller.

6C7

### AUXILIARY DOME LAMP

Auxiliary dome lamp is located on the headliner to the rear of the overhead console and is switched at the rear lamp base. Lamp is wired separately standard dome lamps with red and white LED bulbs.

## OPTIONAL EQUIPMENT

6N5

### SWITCHES - REAR WINDOW INOPERATIVE

Rear door window switches are inoperable. Rear door power regulators are operable only from driver position switches.

6N6

### REAR DOOR LOCKS AND HANDLES INOPERATIVE

Rear door locking rods are disabled. Rear door locks are inoperable at rear doors, but operate from driver position. Inside rear door handles are disconnected. Rear doors can only be opened from the outside.

### RADIO SUPPRESSION GROUND STRAPS

Provides additional grounding in the following locations:

1. Left hand front frame body mount bracket to underbody
2. Left hand rear frame body mount bracket to rear underbody
3. Right hand rear frame body mount bracket to rear underbody
4. Right hand front frame body mount bracket to underbody
5. Exhaust pipe hanger rod to rear frame hanger

UN9

### GROUND STRAPS AND HARDWARE KIT

The UN9 ground straps and hardware kit is shown below in the plastic bag which is wire tied to the rear cargo blunt cut harness and accessible when the driver side rear cargo area fuse panel access door is removed. This kit should be installed per the I-sheet which can be found at the GM Upfitter.com site at the following link: [https://www.gmupfitter.com/files/media/photo/1500/UI%20Bulletin\\_173\\_PRELIM.pdf](https://www.gmupfitter.com/files/media/photo/1500/UI%20Bulletin_173_PRELIM.pdf)

## OPTIONAL EQUIPMENT

**6J3**

### WIRING PROVISIONS FOR VEHICLE GRILLE LAMPS AND SPEAKER/SIREN

Blunt cut circuit wires are in the Upfit Branch Harness between front seats (CONSOL) and in cargo area (CARGO) as listed in Upfit Wiring Harness List. The blunt cut circuit wires for customer-furnished grille lamps and siren speaker are coiled at the radiator. Circuits 8855 and 8856 are for powering LED grille lamps. Circuit 8857 is ground, 8858 is for lamp sync and 8859 is for lamp steady burn. Circuit 8861 is speaker high and 8862 is speaker low. 8860 circuit is spare.

NOTES: Wiring connection or splices are to be removed before the vehicle is returned to civilian use.

**WX7**

### WIRING PROVISION FOR FRONT SPEAKERS

Approximately 60 inches (1.5 m) of auxiliary speaker wiring is coiled between the front seats (CONSOL) with the Upfitter Branch harness. The wiring permits connection of the front speaker pairs to customer-installed communication equipment. Vehicle radio front speaker outputs are re-routed to the rear speakers to maintain the required open door/key-in-ignition and other audible warnings.

#### NOTES:

- Wiring connection or splice changes are to be removed before the vehicle is returned to civilian use.
- For wiring diagram see Wiring Section

**6J4**

### WIRING PROVISION FOR HORN SIREN CIRCUIT

This provision permits customer connection of a switch to select either horn or siren operation when the horn pad is pressed.

A 22-gauge (0.35 mm<sup>2</sup>) wire is connected to an in-line connector in the horn circuit of the instrument panel harness under the instrument panel. The end of this harness extension is a 5-foot (1.5 m) loop of wire coiled under the center of the instrument panel.

#### NOTES:

- Wiring connection or splice changes are to be removed before the vehicle is returned to civilian use.
- For wiring diagram see Wiring Section

# UPFIT WIRING HARNESS CIRCUIT<sup>1</sup> IDENTIFICATION BETWEEN FRONT SEATS AND LEFT SIDE CARGO SPACE

Original Equipment Alterations: Warranty does not cover any damage or failure resulting from modification or alteration to the vehicle's original equipment as manufactured or assembled by General Motors. Examples of the types of alterations that would not be covered include: installation or use of any non-GM part, accessory, materials, or the cutting, welding or disconnecting of the vehicle's original equipment parts and components. Any upfit device<sup>1</sup> connected to the open ended blunt cut circuits should be fuse protected per the "Wire Gage Table" on page 45

25	1.25	16
30	2.00	14
40	2.50	12
50	4.00	11
60	5.00	10
70	6.00	9
80	8.00	8
100	10.00	7

### INTERRUPTIBLE RETAINED ACCESSORY POWER

The Power Mode Master (PMM) Controls components as needed. If equipped with a Retained Accessory Power (RAP) relay, the BCM controls the Retained Accessory Power with an exception: Interruptible Retained Accessory Power (IRAP) is deactivated during transmitter authentication. During Transmitter Authentication the PMM will deactivate components including IRAP to prevent Radio Frequency (RF) Interference (RFI) that may cause a "NO REMOTE DETECTED" message to be displayed on the drivers information center.

Note: If transmitter Authentication occurs while in Run or Propulsion Modes, it is normal for IRAP to be interrupted momentarily (i.e. items connected to auxiliary power ports or chargers may momentarily go off then come back on). If a remote transmitter was not been previously detected, Transmitter Authentication can occur under any of the following conditions:

- The driver's side front door is opened.
- The driver's side rear door is opened.
- The S38 Vehicle On/Off Switch is pressed.

<sup>1</sup>. GM is not responsible for the safety or quality of design features, materials or workmanship of any alterations by third parties.

## OPERATION-DESCRIPTION OF SEO WIRING FEATURES

Refer to UPFIT WIRING CIRCUITS CHART for circuit wire numbers and colors

### RELAY CONTROLLED 12 VOLT BATTERY POWER

A relay and fuse block (X51B) is located in the left instrument panel above the brake pedal. Four relays are provided for customer connection to 12 primary battery power. The relay coils are fused at 10 amps and are operated via connection to the coil ground side circuits in the upfitter harness branches between front seats or in the cargo area. Also in the upfitter harness branches are circuits for connection to the relay contact load sides. The relays are powered by the primary battery located in the engine compartment UBEC. Customer load is connected to the fused relay contact circuits (circuits chart 8911-8914). Power and ground from the Auxiliary Battery are located in the CONSOL upfitter branch (60 amp) and the CARGO area (80 amp).

### VEHICLE SYSTEMS CIRCUITRY

The following Vehicle Systems Circuits are found in the upfitter branch harnesses between the front seats (CONSOL) and at the left side of the CARGO area:

817, Vehicle Speed Signal - 4000 pulses per mile square wave.

2801, Interruptible Retained Accessory Power\* - 12 v when ignition in Accessory position. Times off after 10 minutes.

4939, Run-Crank, Ignition - 12 v when engine is being cranked or running.

8917, Driver Door Ajar - Ground from door latch switch when driver door is open.

6821 Surveillance - BCM calibration. Grounding the circuit disables all automatic lighting.

820, Brakes Applied - 12 v available when service brakes applied. 12 v Not confirmed

5813, Park Enable - 12 v available when transmission in Park.

6817, I P Dimming - Calibration for IP lighting dimming when circuit is grounded. Not confirmed

\* See page 45 of this guide for detail

### SEO 6J3 -WIRING PROVISION FOR GRILLE LAMPS AND SIREN SPEAKER OPTIONAL

Circuits for wiring grille lamps and a siren speaker are located in the CONSOL and CARGO area upfitter branch harnesses and are listed in the UPFIT WIRING CIRCUITS chart (circuits 8855-8862). A wiring harness is coiled at the radiator for connection to the customer provided front emergency lamps and siren speaker.

### SEO 6J4 - WIRING PROVISION FOR HORN-SIREN ALTERNATE OPERATION OPTIONAL

A single wire loop is connected to the instrument panel wiring and located near the CONSOL upfitter branch harness. The wire can be connected to a steering wheel switch or other customer provided switch to operate the siren with the steering wheel horn button in place of the vehicle horn.

### STEERING WHEEL SWITCHES

The steering wheel is equipped with switches for police radio or siren speaker Push-to-Talk and a switch for emergency lighting control.

### WIRING PROVISION FOR POLICE RADIO MICROPHONE

Wiring circuits are included in the CONSOL and CARGO upfitter branch harnesses to connect to customer-provided police radio speakers mounted in the vehicle headliner (circuits 1850, 8899-8900).

### SEO WX7 - WIRING PROVISION FOR CUSTOMER CONNECTION TO FRONT DOOR SPEAKERS

Wiring circuits are provided near the CONSOL upfitter branch harness to permit customer-installed communication equipment to be connected to the front door speakers; see circuit chart for wire colors. The vehicle radio front speaker outputs are re-routed to the rear door speakers to maintain the required door open, key-in-ignition seat belt and other audible warnings. A vehicle radio mute circuit is included.

## OPERATION-DESCRIPTION OF SEO WIRING FEATURES

---

### **SEO 6J7 - FLASHER SYSTEM, HEADLAMPS AND TAIL LAMPS ALTERNATE FLASHING.**

Calibrations are available to alternately flash the headlamp high beams and either the tail lamps alternately Red-White or alternately Red-Red (circuits 8863-8865). Selecting High Beam or applying service brakes overrides flashing.

---

### **SEO T53 - LIFTGATE WARNING LAMPS**

LED lamps are mounted at the bottom of the rear liftgate and are enabled to flash red when the lift gate is opened. Customer must locate and connect a grounding wire found near an opening in the lift gate trim near the right warning lamp to enable the flash when the lift gate is opened. A switch is provided in glove box and is to be customer-installed to a connector located near the right warning lamp to permit disabling the lamps when the lift gate is open (8868 for steady flashing).

---

### **7X2/7X3 LED spot lamps**

Windshield pillar grab-handles are removed and alternate trim installed.

## STABILITRAK

**Stabilitrak systems help drivers maintain control of their vehicles, especially during emergency lane changes or avoidance maneuvers. Stabilitrak uses various sensors, such as steering wheel angle, wheel speed, yaw velocity, etc., to detect any difference between the path requested by the steering wheel position and vehicle's actual path. When appropriate, the system selectively controls brakes, engine power, and even suspension settings to enhance control of the vehicle's direction and help keep it on course. See your owner's manual for additional information about the operation of Stabilitrak.**

### **Q. How do I use Stabilitrak?**

A. StabiliTrak operates independently of the driver. You should continue to drive your Stabilitrak equipped vehicle with caution and care. GM's Stabilitrak system, Stabilitrak is designed to be as seamless as possible in operation, and part of the overall vehicle response.

### **Q. How does Stabilitrak work?**

A. Stabilitrak has the ability to apply control forces to the vehicle independent of the driver. Stabilitrak uses sensors to continuously compare the path indicated by the steering wheel position to the vehicle's actual path. If a discrepancy is detected, Stabilitrak selectively controls vehicle brakes and engine torque to create a yaw moment that helps restore the vehicle's actual path to the path indicated by the steering wheel position. Stabilitrak has the ability to help correct both understeer (where the vehicle is not turning as much as the steering wheel position indicates) and oversteer (where the vehicle is turning more than the steering wheel position indicates).

### **Q. Will a tire change affect Stabilitrak?**

A. Use of tires other than original equipment may affect Stabilitrak performance. Stabilitrak is designed to make the best use of available traction. The performance characteristics of the original equipment tires are part of the overall system effectiveness. When you replace tires check the recommendations in your owner's manual. On GM vehicles, the original equipment tires have a "TPC" (Tire Performance Criteria) code on the sidewall. Replacing the tires with the same "TPC" code will help assure proper Stabilitrak performance.

## TRACTION CONTROL

### **An advanced computer controlled stability**

Enhancement system assists the driver with directional control of the vehicle in difficult driving conditions. Each time the vehicle is started, the Stabilitrak system is fully on. Stabilitrak can be controlled by a Traction Control Button. The condition system is displayed by a Stabilitrak indicator light and Driver Information Center (DIC) Message. Push once to disable Traction Control. Push and hold to disable both Traction Control and Stabilitrak. In this condition, Stabilitrak will automatically turn ON when the vehicle speed exceeds 35 mph (56km/hr) while the Traction Control remains OFF. Push again to enable Traction Control and Stabilitrak.

## VEHICLE LOAD LIMITS

This information is intended for those who intend to install additional equipment on the police vehicle after it has left the factory, and for those who will be driving and loading the vehicle with passengers and/or cargo. Two labels on your vehicle show how much weight it was designed to carry, the Tire and Loading Information label and the Certification/Tire label. These labels are attached to your vehicle and give you the maximum load capacity, the Gross Vehicle Weight Rating (GVWR) and the Gross Axle Weight Rating (GAWR) for your vehicle. See "Vehicle Load Limits" in the owner manual Index for additional loading information.

The following guidelines can help you with proper loading and load distribution when installing additional equipment on the Tahoe Police Package.

### **WARNING**

**DO NOT LOAD THE VEHICLE ANY HEAVIER THAN THE GROSS VEHICLE WEIGHT RATING (GVWR), NOR EITHER THE MAXIMUM FRONT OR REAR GROSS AXLE WEIGHT RATING (GAWR). THIS CAN CAUSE SYSTEMS TO BREAK AND CHANGE THE WAY THE VEHICLE HANDLES. THIS COULD CAUSE LOSS OF CONTROL AND A CRASH. OVERLOADING CAN ALSO SHORTEN THE LIFE OF THE VEHICLE.**

### **ADDING EQUIPMENT TO YOUR VEHICLE**

Before adding accessories or equipment to your police vehicle, there are some things you need to know

- The police vehicle's maximum capacity weight (payload). The weight of your police vehicle, including a full tank of fuel but without a driver and passengers.
- The weight of items you plan on adding to your police vehicle, like roof mounted light bar(s), push bumpers, security barrier(s), rear storage organizer, highway flares, fire extinguishers, weapons, ammunition, radios, and video equipment.
- The weight and number of passengers you intend to carry in your vehicle.
- The total weight of any additional cargo you intend to carry in your vehicle.

When planning your vehicle equipment installation remember not to exceed the Gross Vehicle Weight Rating (GVWR) or the Gross Axle Weight Rating (GAWR) of the front or rear axles. To keep the available load weight less than the vehicle capacity weight, you may need to limit the number of passengers you carry in your vehicle or change your choice of additional equipment. Towing a trailer may change the vehicle payload capacity.

### **CENTER OF GRAVITY (CG)**

A vehicle's center of gravity is an imaginary location inside the vehicle and is a balance point for the vehicle mass as it moves down the road. The police vehicle's center of gravity, before you add a load and passengers, is approximately midway between the center of the axles, up from the ground to just below the front window, and between the driver and passenger. Equipment location and weight on the vehicle's center of gravity is important to keep in mind when planning an installation. Heavy equipment should be positioned as low and as far forward in the rear load compartment as possible. Try to mount the equipment below the bottom of the side windows. Refer to the Loading Zone chart and diagram to help with your installation plan.

A procedure to make the necessary measurements and formulas to calculate the vehicle longitudinal, lateral and vertical position of the center of gravity can be found in the GM Coachbuilders Manual.

Equipment required to conduct the measurements for calculating the center of gravity are:

- Weight scales of sufficient capacity to measure the vehicle weight at each wheel.
- A post type hoist or other means to safely elevate the front of the vehicle to at least an angle of 20 degrees above horizontal.

See your GM dealer to get more information about this coachbuilder procedure.

Keeping the center of gravity midway between the axles is also important to provide proper braking performance. About half the total vehicle weight on each axle is recommended.

Weigh your vehicle after the additional equipment has been installed to determine the actual weight of your vehicle. Weigh the vehicle with a full tank of fuel and without passengers. You may need to put a limit on how many people or other equipment you can carry inside your vehicle after the additional equipment has been installed.

**Note: See loading zone weight chart and diagram**

## LOADING ZONES

**LOADING ZONES FOR CUSTOMER INSTALLED EQUIPMENT AND CARGO WITH SIX OCCUPANTS  
REFER TO YOUR VEHICLE TIRE PLACARD FOR VEHICLE SEATING CAPACITY AND PAYLOAD CAPACITY  
(OCCUPANTS + CARGO)**

- A. FRONT FLOOR TO ROOF ZONE AREA
- B. FRONT ROOF ZONE AREA
- C. BACK OF FRONT DOOR
- D. REAR ROOF ZONE AREA
- E. REAR FLOOR TO ROOF ZONE AREA
- F. GROUND

**LOADING ZONE WEIGHT CHART TAHOE POLICE PACKAGE 2WD 9C1**

LOADING ZONES	FRONT AXLE WEIGHT	REAR AXLE WEIGHT	TOTAL
ROOF	34 LBS (15 KG)	47 LBS (21 KG)	81 LBS (36 KG)
FLOOR TO ROOF	125 LBS (57 KG)	494 LBS (224 KG)	619 LBS (281 KG)
<b>TOTAL</b>	<b>159 LBS (72 KG)</b>	<b>541 LBS (245 KG)</b>	<b>700 LBS (317 KG)</b>

**LOADING ZONE WEIGHT CHART TAHOE POLICE PACKAGE 4WD 9C1**

LOADING ZONES	FRONT AXLE WEIGHT	REAR AXLE WEIGHT	TOTAL
ROOF	34 LBS (15 KG)	47 LBS (21 KG)	81 LBS (36 KG)
FLOOR TO ROOF	125 LBS (57 KG)	494 LBS (224 KG)	619 LBS (281 KG)
<b>TOTAL</b>	<b>159 LBS (72 KG)</b>	<b>541 LBS (245 KG)</b>	<b>700 LBS (317 KG)</b>

**NOTE:**

CARGO WEIGHT CAN BE GREATER WITH FEWER OCCUPANTS. TOWING A TRAILER MAY CHANGE VEHICLE PAYLOAD. REFER TO YOUR OWNER'S MANUAL SUPPLEMENT FOR DETERMINING MAXIMUM CARGO LOADING AND POSITIONING. USING HEAVIER SUSPENSION COMPONENTS TO GET ADDED DURABILITY MIGHT NOT CHANGE YOUR WEIGHT RATINGS AND MAY AFFECT THE VEHICLE PERFORMANCE AND HANDLING CHARACTERISTICS.

HIGH SPEED OPERATIONS SHOULD NOT BE ATTEMPTED WITH AN IMPROPERLY OR OVERLOADED VEHICLE OR WHILE TOWING A TRAILER.

YOUR GM DEALER CAN PROVIDE HELP WITH PROPERLY LOADING YOUR VEHICLE.

# AIRBAGS

## TAHOE HEAD-CURTAIN AND FRONT SEAT SIDE IMPACT AIRBAGS

### HEAD CURTAIN AIRBAG

DRIVER SIDE SHOWN - PASSENGER SIDE SIMILAR

- A. AIRBAG WIDTH 10.6IN / 270MM
- B. AIRBAG HEIGHT 19.7 IN / 500MM

### FRONT SEAT SIDE IMPACT AIRBAG

DRIVER SEAT SHOWN - FRONT OUTBOARD PASSENGER SIMILAR

- A. AIRBAG WIDTH 7.9IN / 201MM
- B. SEAT & AIRBAG FORWARD TRAVEL 6.6IN / 167MM
- C. AIRBAG HEIGHT 19.7IN / 500MM

Sitting too close to an airbag when it deploys can increase the risk of serious injury or death. Always properly wear your seat belt. See Owner’s Manual for more information.

## AIRBAGS

Sitting too close to an airbag when it deploys can increase the risk of serious injury or death. Always properly wear your seat belt. See Owner's Manual for more information.

# AIRBAGS FAQ

**Q: Can equipment such as radar devices, video cameras, and radio trees be mounted in a specialty vehicle equipped with a right front passenger frontal airbag?**

A: Yes, but care must be taken to properly mount the equipment outside of the airbag "deployment zone."

**Q: What is the airbag "deployment zone"?**

A: The term "deployment zone" describes the space an airbag takes up when fully inflated. Airbags need room to work properly, and anything in the "deployment zone" – such as improperly mounted equipment – can greatly affect the performance of the airbag.

**Q: How can I identify the airbag "deployment zone" in my vehicle?**

A: See Airbag Deployment Diagrams for more information. The diagrams provide the approximate dimensions of the "deployment zones" for your specialty vehicle. Before doing any service work, including the installation of any equipment, consult the appropriate service manual.

**Q: Is it possible to shield equipment so it does not interfere with airbag deployment?**

A: While shielding may protect certain equipment from being damaged or dislodged, it may also negatively affect how an airbag inflates. Therefore, we do not recommend the placement of any equipment in the deployment zone, even if shielded.

**Q: Can the installation of push bumpers on the front end of the vehicle affect the deployment of the airbag?**

A: It is not likely that installing push bumpers will affect deployment for the airbag as long as the vehicle structure itself is not modified. GM is not aware of any adverse defects effect on the deployment of the front airbags due to use of many aftermarket push bumpers installed on current GM police vehicles

See "Adding Equipment to the Airbag-Equipped Vehicle" in the owner manual for more information.

## Customer-Installed Equipment

Before installing equipment, read the following.

Airbags inflate with great force, faster than the blink of an eye. No objects, such as shotguns, should be placed over or near the airbag covers. Equipment mounted too close to an inflating airbag could prevent the airbag from operating properly to protect the occupants or could be forced into an occupant or break and become a dangerous projectile, causing severe injury or even death. To help prevent injury and to allow the airbag to perform as it was designed, do not mount equipment inside the airbag deployment zones.

Do not attach anything to the steering wheel hub or mount any equipment within the deployment zone for the driver airbag.

Do not mount equipment on the passenger side of the instrument panel top pad deployment zone. Equipment should not be mounted on or around the passenger airbag opening because of a deploying airbag. To allow the airbag to perform as it was designed, do not mount equipment inside the airbag deployment zone.

Do not mount a security barrier such that the ends of the barrier or brackets are within the roof-rail airbag deployment zones.

Avoid installing wiring for roof-rail emergency lighting or radio antennas that may restrict the proper deployment of the roof-rail airbags.

GM approved service procedures must be followed to remove and reinstall the instrument panel to the pad to ensure proper airbag deployment.

The police vehicle has a rollover sensor mounted on the centerline of the vehicle between the driver and front outboard passenger positions. If the vehicle has individual front seats, the rollover sensor will be exposed. Do not mount equipment within 25 mm (1 in) of the rollover sensor. This may affect the performance of multiple restraint systems.

## MAINTENANCE / LIMITED WARRANTY

<b>INCLUDED MAINTENANCE</b>	One visit within first year of vehicle delivery <sup>1</sup>
<b>BUMPER-TO-BUMPER LIMITED WARRANTY</b>	3 years/36,000 miles <sup>2</sup> . Bumper-to-Bumper Limited Warranty with no deductible
<b>TRANSFERABLE POWERTRAIN LIMITED WARRANTY</b>	Qualified Fleet Customers: 5 years/100,000 miles <sup>3</sup>
<b>TIRES<sup>4</sup></b>	3 years/36,000 miles <sup>2</sup> ; coverage prorated after first 12,000 miles
<b>ROADSIDE ASSISTANCE AND COURTESY TRANSPORTATION</b>	Qualified Fleet Customers: 5 years/100,000 miles <sup>3</sup>
<b>RUST-THROUGH</b>	6 years/100,000 miles <sup>2</sup>
<b>CORROSION</b>	3 years/36,000 miles <sup>2</sup>
<b>WHEEL ALIGNMENT AND BALANCE</b>	Up to 7,500 miles <sup>6</sup>

**1.** Includes first required maintenance visit as stated in vehicle maintenance schedule. Maintenance visit consists of oil change, tire rotation and Multi-Point Vehicle Inspection. Does not include air filters. See participating dealer for other restrictions and complete details. Excludes vehicles ordered with fleet delete option RY9. **2.** Whichever comes first. See dealer for limited warranty details. **3.** Whichever comes first. A Qualified Fleet User is defined as a company that has purchased and registered or leased five (5) or more new cars/or trucks solely for use in its operation during the current or preceding calendar year, model year, preceding twelve (12) month period, or that owns or leases fifteen (15) or more cars and trucks. Excludes rental customers. See dealer for details. **4.** Tires also covered under the Bumper-to-Bumper Warranty but are prorated based upon mileage. See dealer for warranty details. **5.** If the vehicle has a warrantable failure, see your Owner's Manual for full details on the Courtesy Transportation program. **6.** Customer maintenance item after 7,500 miles.
